

## Panasonic®

**Building Passion,  
Building Solutions.**  
Panasonic Air Conditioning Systems

We face a time in which "quality air" differentiates business. It's a time for Panasonic to fully display its strengths. Our ability to assemble and build superior systems isn't just due to the rich resources we have as a comprehensive electronics manufacturer, but also to Panasonic's 100 years of tradition, where each person thinks and acts on their own initiative while working in a team to reach further heights. We do not compromise. Each of our independent selves is a one stop solution. We face our customers' challenges together with our customers and do all that we can to build effective systems. As a true partner for our customers, we strive to always be at the forefront of business.

- Please read the Installation Instructions carefully before installing the unit, and the Operating Instructions before using it.
- Specifications are subject to change without prior notice.
- The contents of this catalogue are accurate as of March 2021.
- Due to printing considerations, actual colours may vary slightly from those shown.
- All graphics are provided solely for the purpose of illustrating a point.

Do not add or replace refrigerant other than the specified type.  
Manufacturer is not responsible for damage or deterioration in safety due to usage of other refrigerant.

A Better Life, A Better World

QUALITY AIR FOR LIFE

# The new Panasonic NX series

## The next generation is now

The new CONEX remote controller (CZ-RTC6BLW/CZ-RTC6Z) multiplies the benefits of a standard nanoe™ X installation, letting you create clean, healthy air in your living spaces 24 hours a day, anytime, anywhere.

Choose your quality of air - a new era in air conditioning solutions is here.

**24-hour nanoe™ X Air Purification**

Unlike the general filters found in an air purifier, nanoe™ X achieves a powerful inhibiting effect on not only airborne, but also adhered bacteria and viruses.

Make comfort more accessible with CONEX

CONEX goes beyond simple remote control to combine sophistication with simplicity, offering IoT integration that connects directly to a variety of apps for next-generation solutions.

P. 22-25 / P. 28-31

Maximum versatility adaptive ducted unit

Designed to deliver flexibility, performance, and comfort, Panasonic introduces an industry-leading horizontal/vertical design featuring powerful 150Pa static pressure in a compact unit.

Note: PF3 range only.

2

\*1 The nanoe™ X mode can be run independently from cooling or heating mode, and needs to be on for the 24 hour air purification to function.

# 24-hour nanoe™ X Air Purification<sup>\*1</sup>

nanoe™ X works to inhibit longer-living, adhered bacteria and viruses. The CONEX remote control (CZ-RTC6BLW/CZ-RTC6Z) gives you access to your air conditioner anywhere, anytime, so you can turn nanoe™ X on even while you're out and enjoy 24-hour quality air in your home.

<sup>\*1</sup> The nanoe™ X mode can be run independently from cooling or heating mode, and needs to be on for the 24 hour air purification to function.

<sup>\*2</sup> <https://www.businessinsider.com/coronavirus-lifespan-on-surfaces-graphic-2020-3>

## nanoe™ X works even in larger spaces<sup>\*3</sup>

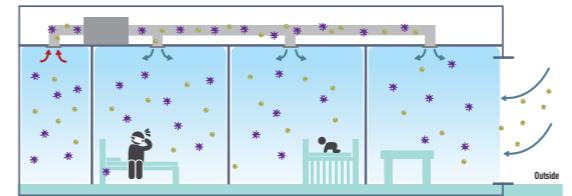

nanoe™ X technology is used in a wide range of product lines, with proven effects<sup>\*4</sup> in both large and small spaces.

<sup>\*3</sup> Depends upon the actual system installed and varies depending upon room configuration.

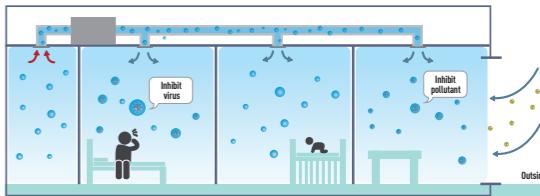

<sup>\*4</sup> Please refer to P.8 for more information

### Standard ducted air conditioning system without nanoe™ X

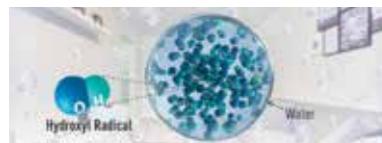

Viruses or bacteria carried by a room's occupants, as well as external pollutants from open windows, may actually be circulated around a home by conventional air conditioning.

### Panasonic ducted air conditioning system with nanoe™ X

With a nanoe™ X-equipped ducted unit, it's not only viruses and bacteria that are circulated, the ducted unit itself produces a massive 9.6 trillion hydroxyl radicals per second which are delivered to rooms throughout the house, inhibiting viruses and bacteria.

## How does nanoe™ X technology work against viruses?

### ① Huge Quantity

9.6 trillion hydroxyl radicals are generated per second, inhibiting bacteria and adhered viruses. (nanoe™ X Generator Mark 1 generates 4.8 trillion hydroxyl radicals/ sec)

### ② Longer lifespan

By creating hydroxyl radicals contained in water, nanoe™ X technology, increasing hydroxyl radicals lifetime so that nanoe™ X can spread over long distances.

<https://www.panasonic.com/au/nanoe/all-how-nanoe-works.html>

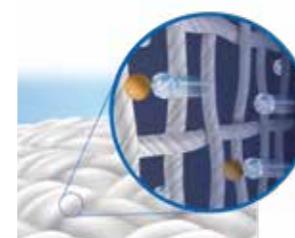

### ③ Actively fill the room

Going beyond standard filter technology, hydroxyl radicals circulate throughout rooms inhibiting both airborne and adhered bacteria and viruses.

## Effective on adhered pollutants

nanoe™ X penetrates deep into fabrics and deodorises, inhibits bacteria, viruses, mould, allergens, pollen and hazardous substances.

nanoe™ X extensively spreads out through the room to inhibit adhered pollutants adhering to surfaces, while air filters only collect airborne dust but adhered substances.

## 24hr nanoe™ X comfort, wherever you are, anywhere, anytime

Get 24 hr Quality Air for you and your loved ones by turning nanoe™ X on using Panasonic Comfort Cloud<sup>\*5</sup> even when you're out, and enjoying clean air when you're at home. nanoe™ X functions in both cooling and heating modes and is maintenance-free, helping you keep your costs down with cleaner air.

### Clean air independently when you are away (Fan Mode + nanoe™ X ON)

<sup>\*5</sup> Wireless LAN Remote Control for Internet Connection required optional network adaptor. Indoor temperature display and some special function are not available through the App for some models.

<sup>\*6</sup> Energy consumption may vary depending on models and the external static pressure.

## Verification tests for nanoe™ X effects in large spaces

### The nanoe™ X inhibited hexadecane, a chemical contained in PM2.5 (267m<sup>2</sup>)

A third-party certification organization SIRIM Berhad (SIRIM)\*1, conducted the performance experiment using a 4-Way Cassette equipped with a nanoe™ X device to inhibit hexadecane\*2, a chemical contained in PM2.5.

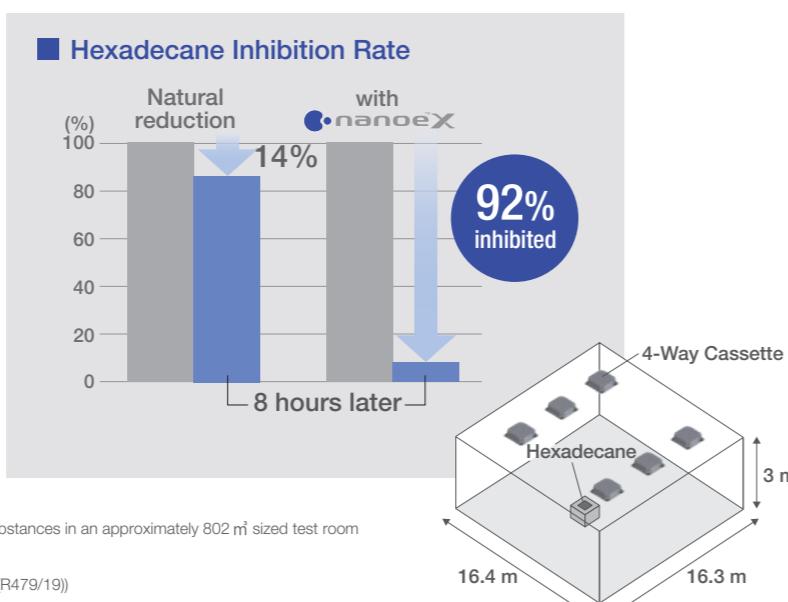

\*1 SIRIM is a premier industrial research and technology organisation in Malaysia, a wholly-owned company of the Malaysian Government under the Ministry of International Trade and Industry (MITI).

\*2 Hexadecane is a hazardous substance contained in gasoline and diesel exhaust gas.

Testing method: Measured the amount of attached organic substances in an approximately 802 m<sup>2</sup> sized test room  
Inhibition method: nanoe X Generator Mark 1 released

Test substance: Hexadecane

Test result: Broken down 92% in 8 hours (ETRC257/16/1402 (R479/19))

3rd party

## The effects of nanoe™ X are recognised by experts in each field

**Professor  
Masafumi  
Mukamoto**

Osaka Prefecture University  
Veterinary Infectious  
Disease Studies

Various types of moulds enter houses along with people and air. Even if preventive action is taken in our everyday lives, it is often very difficult to inhibit the growth of mould, especially in humid environments. With nanoe™ X, we have experimental results\*3\*4 that show we can inhibit the growth of the types of mould and bacteria commonly found in various places in the house.

## Hope for the creation of more comfortable spaces for those who have problems with asthma or atopic dermatitis

**Professor  
Masahiro  
Sakaguchi**

Azabu University  
School of Veterinary Medicine  
Laboratory of Veterinary  
Microbiology I

We have experimental results that show nanoe™ X is capable of inhibiting allergens, such as pollen and dust mites. It is important to take precautions against the allergens that we inadvertently inhale in our daily lives. As nanoe™ X is effective in inhibiting invisible allergens, we can expect it will create a cleaner environment. As the safety of nanoe™ X has also been verified, nanoe™ X gives peace of mind to families with small children.

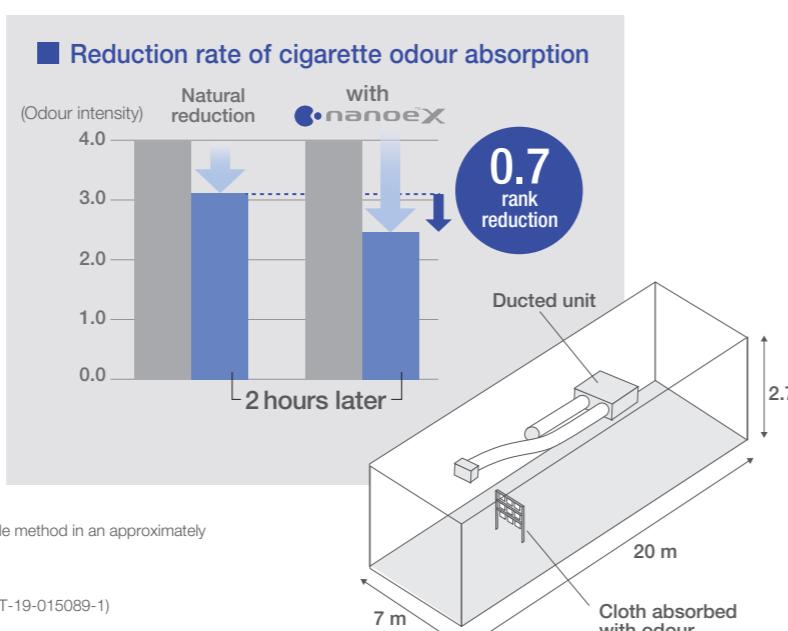

### Cigarette smoke odour

#### Results

Compared to natural reduction, the nanoe™ X blast reduced the odour intensity by more than approximately 0.7 after two hours.

#### Testing organization

KAKEN TEST CENTER General Incorporated Foundation in Japan, international testing institute.

3rd party

Testing method: Verified using the six-level odour intensity scale method in an approximately 378m<sup>2</sup> sized test room  
Inhibition method: nanoe X Generator Mark 2 released  
Test substance: Surface-attached cigarette smoke odour  
Test result: Odour intensity reduced by 0.7 levels in 2 hours (KT-19-015089-1)

\*3 Experimental results show that nanoe™ X is effective in inhibiting the growth of the following types of mould and bacteria commonly found in homes:

Mould: Trichophyton, Cladosporium, Malassezia furfur, Sporothrix schenckii, Exophiala jeanselmei, Absidia corymbifera, Rhodotorula rubra, Neurospora sitophila, Schizophyllum commune  
Bacteria: Methicillin-resistant Staphylococcus aureus (MRSA), Listeria monocytogenes, Bacillus subtilis, Mycobacterium smegmatis, Nocardia asteroides, Neisseria gonorrhoeae, Salmonella enterica subsp. Enterica, Haemophilus influenza, Campylobacter jejuni.

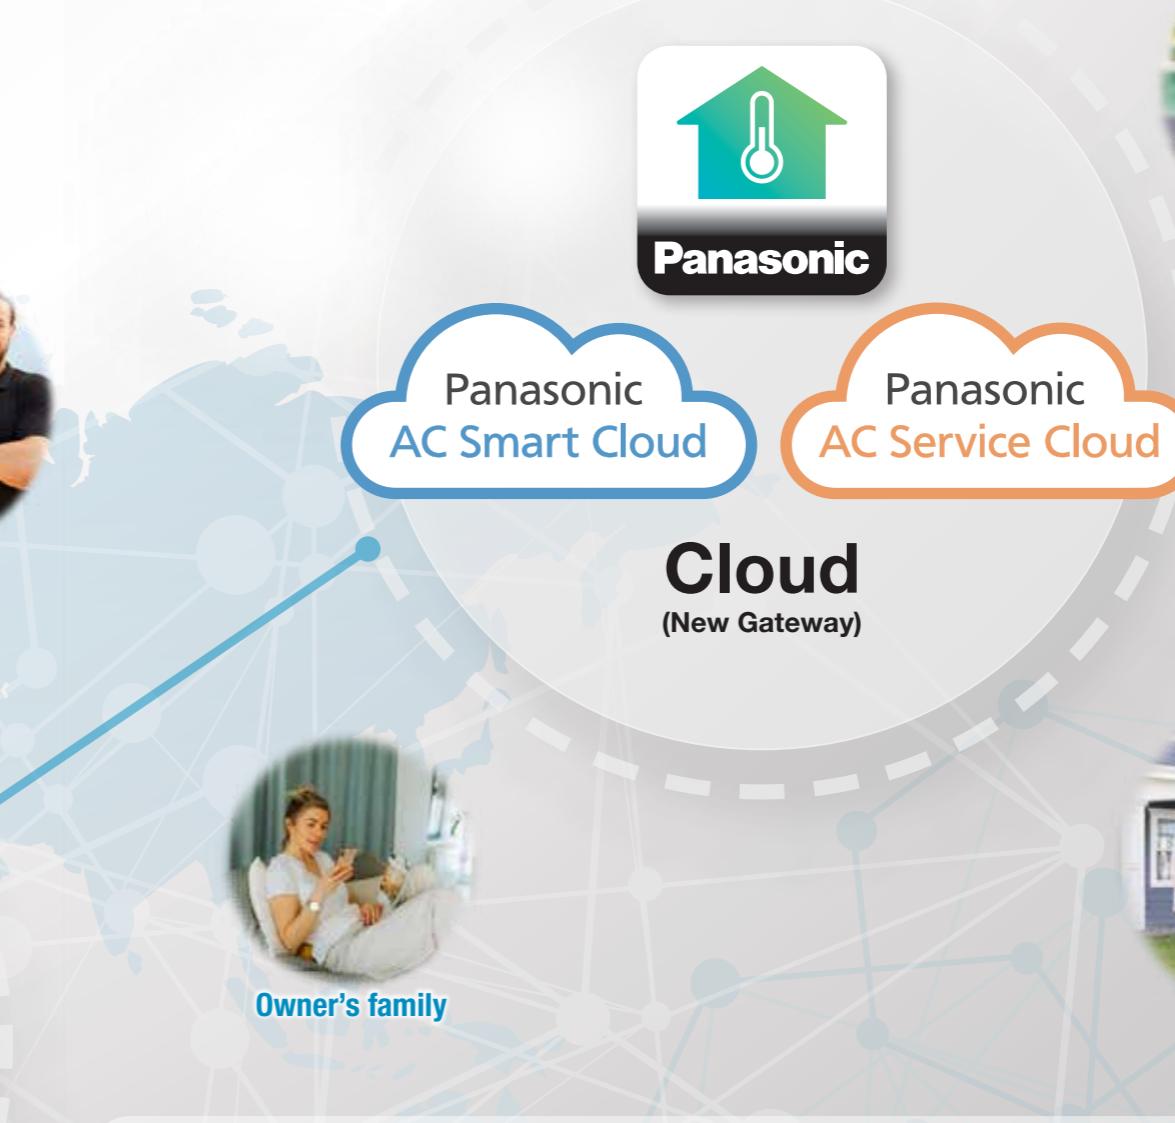

\*4 This verification was designed to generate basic research data on the effects of nanoe™ X on the mould and bacteria in laboratory conditions different from those found in living spaces. It was not designed to evaluate product performance.

# Provide a New Gateway that Creates New Value for the Air Conditioning Business

Panasonic utilises advanced IoT technology and cloud service to provide new values that go beyond just cooling and heating solutions.

# Smart comfort with CONEX

CONEX goes beyond simple remote control to combine sophistication with simplicity, offering IoT integration that connects directly to a variety of apps for next-generation solutions.

## Simple and sophisticated design in-and-out

User friendly interface with stylish design measuring just 86 x 86 mm, CONEX is an extremely compact remote controller which looks great in any room.

**CONEX**

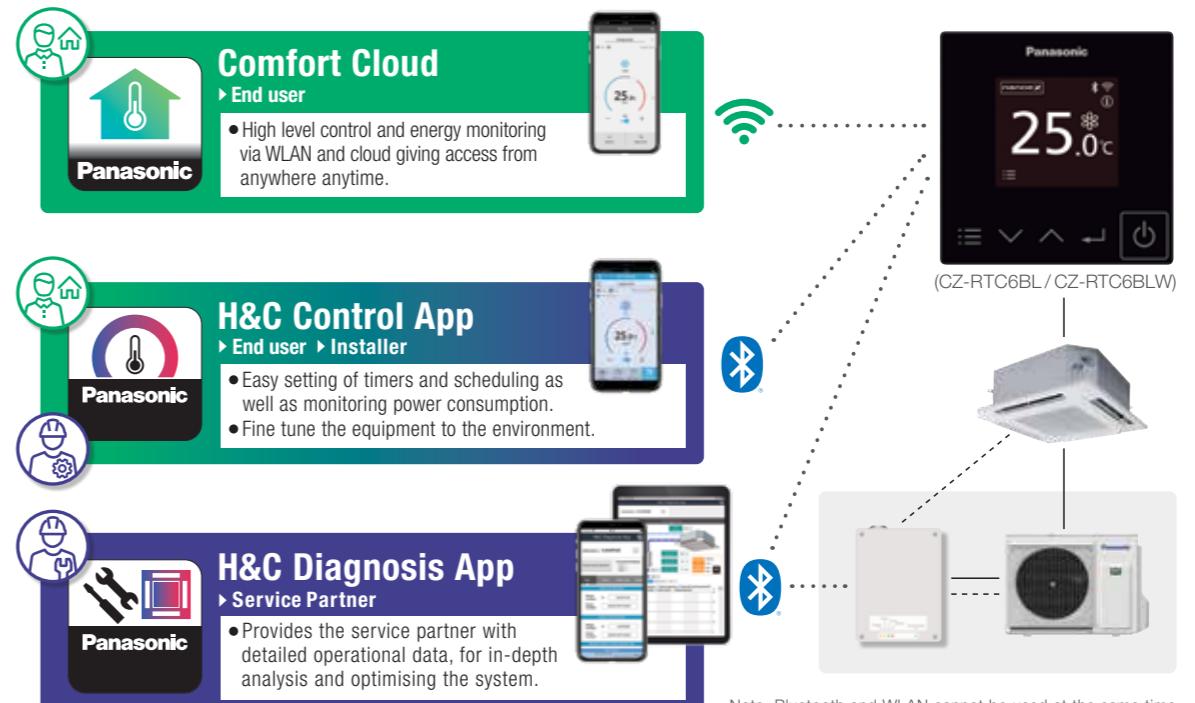

(CZ-RTC6BL / CZ-RTC6BLW)

## Easy control and access for end users, installers, and service partners with just one remote

User-friendly day-to-day operation for end users, simplified set up for installers, and convenient after-sales service access for service partners - all with one remote control.

A next-generation remote control solution optimised for usability, whatever your needs

Note: Can be used with new NX series only.

Note: Bluetooth and WLAN cannot be used at the same time.

## True-comfort for end user – Comfort Cloud App

With Comfort Cloud, even when you are out, at anytime, you can maintain air quality as you please.

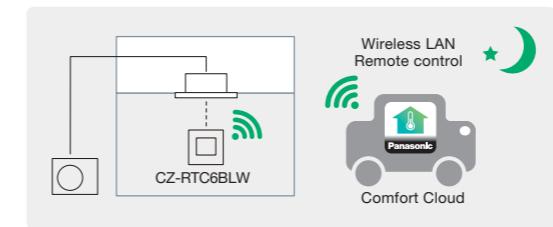

### For restaurant owners

Remote control makes 24-hr nanoe™ X air purification\*1 in restaurants a reality, even when they're closed.

### For shop owners

Air conditioning before opening and give visitors a more comfortable experience.

### For boutique hotel owners

Air conditioning before your guests arrive and give them the welcome they deserve.

\*1 The nanoe™ X mode can be run independently from cooling or heating mode, and needs to be on for the 24 hour air purification to function.

Note: Product images not to scale.

## True-comfort for end user and installer – H&C Control App

H&C Control App makes complex initial set-up easy and allows you to respond swiftly to clients' requests via Bluetooth using a smartphone or tablet.

### Advantages

#### Comfort day-to-day operations

It's now simpler than ever for end users to further customise settings to meet their needs and perform operations including basic settings.

#### Intuitive operation for easy configuration

Simplified initial controller configuration together with easy access to comprehensive settings including weekly timer and maintenance.

#### Straightforward suggestions to clients

Share a single screen with your customer and together tailor everything to meet their needs, from basic setup to weekly timers, all in real time.

#### Quicker configuration for multiple controllers

Save time with templates - Copy weekly timers and settings to multiple controllers.

## True-comfort for service partners – H&C Diagnosis App

The H&C Diagnosis App allows users to intuitively browse current stats and information about an air conditioner via Bluetooth® using a smartphone or tablet and without the need to use a PC.

### Advantages

#### Acquire diagnostic information from both outside and inside

Outdoor diagnosis is now possible via a new service checker interface\*. With CONEX, operation status can be checked and failure can be diagnosed from indoors too. The information you need is now available via both indoor and outdoor units even when site access may be difficult for either indoor or outdoor unit.

\* Available as a spare part, compatible with new NX series only.

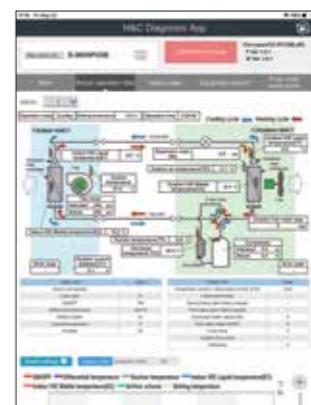

#### Acquire the information you need intuitively and quickly

Easy access to real-time service parameters and service checker data allows for more accurate repairs. Actual real-time operation data can be toggled between system and refrigerant circuit views, and previously recorded data can be viewed in the history.

A comprehensive error code table and guide gives details of error codes and how to handle them.

Refrigerant circuit view

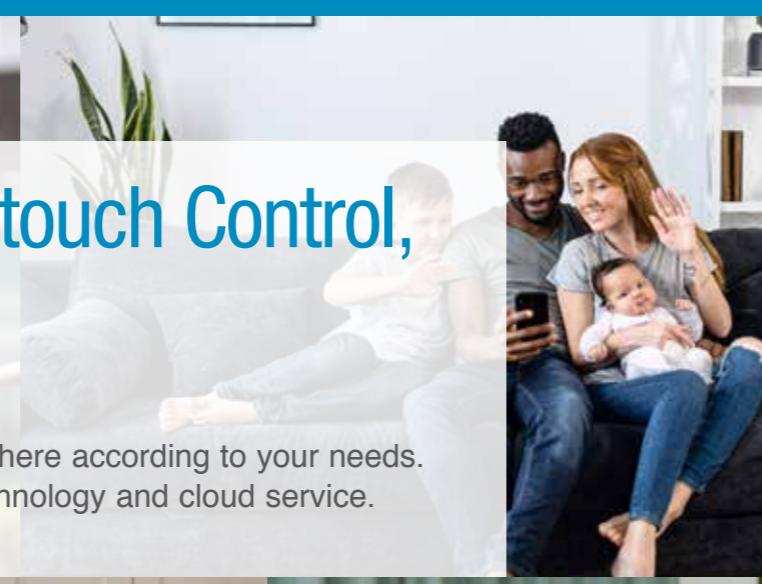

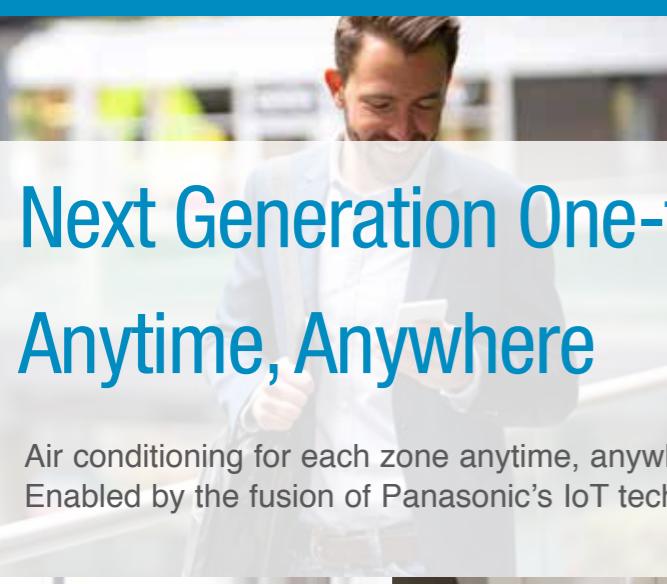

Real time data

History data

New service checker interface

## Next Generation One-touch Control, Anytime, Anywhere

Air conditioning for each zone anytime, anywhere according to your needs.  
Enabled by the fusion of Panasonic's IoT technology and cloud service.

### Comfortable Zone Air Conditioning with Stress-free Operation

#### Individual comfort

- Airflow volume control

The damper opening can be controlled with the Comfort Cloud App.  
Easily adjust airflow volume according to your lifestyle.

**CONEX**  
Zone controller

#### Auto optimised comfort for your lifestyle

- Weekly timer

You can set 6 timers per day.  
Use timers to enjoy optimal control day and night to match your lifestyle.

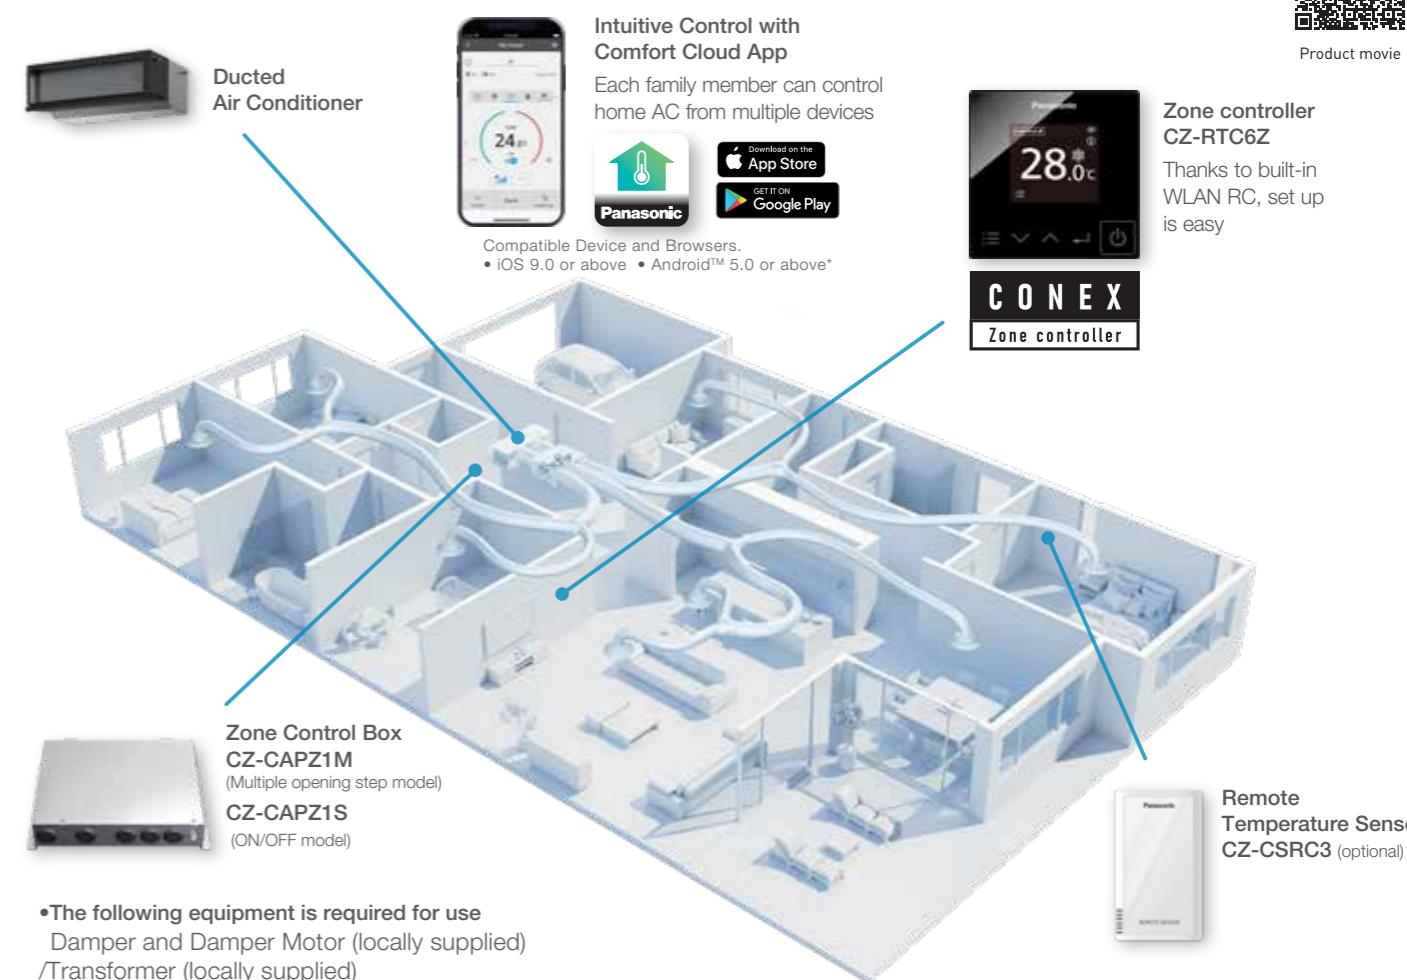

#### Enable comfort for whole family

- Target temperature control

The temp targeted zone can be switched easily according to how you and your family spend time, making the whole family comfortable.

### Manage Up to 8 Zones with an Advanced Zone Control System

\*The following equipment is required for use  
Damper and Damper Motor (locally supplied)  
Transformer (locally supplied)

#### Zone Remote Controller

##### Spec & dimensions

Model No.	CZ-RTC6Z
Dimensions	(H) 86 mm x (W) 86 mm x (D) 25 mm
Weight	0.10 kg
Temperature / Humidity range	0°C to 40°C / 20% to 80% (No condensation) • Indoor use only.
Power Source	DC16 V (supplied from indoor unit)
Wireless LAN standard	IEEE 802.11 b/g/n
Frequency range	2.4 GHz band
Encryption	WPA2-PSK (TKIP/AES)
OS version on the mobile device for CFC	iOS: 9.0 or later Android™: 5.0 or later

#### Zone Control Box

##### Spec & dimensions

Model No.	CZ-CAPZ1S/CZ-CAPZ1M
Dimensions	(H) 250 mm x (W) 342 mm x (D) 70 mm
Weight	1.9 kg

#### Usable indoor units

Zone Controller can be connected with 3.6 kW to 22.4 kW Ducted (PE3 and PF3) Indoors and VRF Ducted units (M1, E1, E2, E1R, F2, F3 and Z1).

\*Connectable to selected Panasonic ducted models only, please consult Panasonic for more details.

Series	PE3	PF3	MM1	ME1	ME2	ME1R	MF2	MF3	MZ1

# All side discharge R32 outdoor units

Panasonic's new range of outdoor units feature intuitive technology and thoughtful engineering. The two innovative ranges of R32 units, both Deluxe and Compact, feature energy and space saving technologies, permitting installation in even the tightest and most demanding conditions.

## More Efficient, Less Space

Whilst maintaining its strong power, new R32 outdoor units get smaller. This enables them to fit into tighter spaces. Thus you can install these units in a vast variety of areas.

All side discharge from 6.0kW to 22.4kW

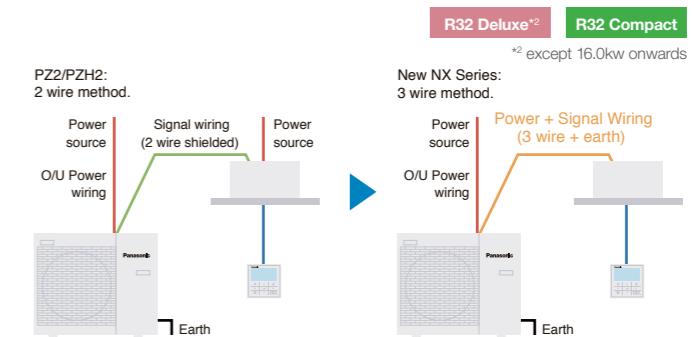

## Industry-leading Small Body with All 1-fan Models

\*1 3 phase

## NX Series - Refurbishing Made Easy

The new NX series has been developed to use 3-wired communication, making it simple to replace the three wire systems often used in older installations.

## Next Generation Refrigerant: R32

R32, an innovative refrigerant in all ways imaginable: it is easy to install, and compared to most other refrigerants it has a much lower environmental impact and saves energy.

- Low Global Warming Potential (GWP): 75% less impact on global warming vs R410A
- Energy Efficient: Higher energy efficiency than R410A
- Easy Installation: This refrigerant is 100% pure which makes it easier to recycle and reuse.

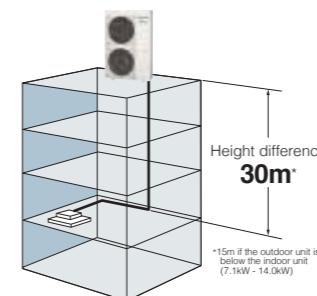

R32 Deluxe    R32 Compact

## Other Advanced Technology

### Increased Piping Length for Greater Design Flexibility

R32 Deluxe

Adaptable to various building types and sizes  
Max. piping length :  
50m (7.1kW),  
85m (10.0kW-14.0kW),  
75m (16.0kW, 18.0kW)  
60m (20.0kW, 22.4kW)

R32 Compact    R32 Deluxe

### Product Quality and Safety

All Panasonic air conditioners undergo strict quality and safety tests before sale. This rigorous process includes obtaining all necessary Safety Approvals, to ensure that all air conditioners we sell are not only built to the highest market standards, but are also completely safe.

### Quiet Mode

R32 Compact    R32 Deluxe

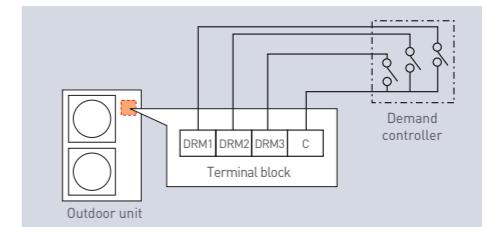

Quiet mode reduces outdoor operating sound by 2dB. External input signal is also available.

### Demand Response Compliant

R32 Compact    R32 Deluxe

Panasonic air conditioners are equipped with a Demand Response Enabling Device (DRED) which complies to both AS 4755 and AS 3823. Panasonic continues to design and develop products that are tailored to local needs and requirements.

The Equipment Energy Efficiency (E3) program has been supporting the development of DRED standards for air-conditioners which should comply with AS 4755. The functionality will be required for all installations in the very near future

Demand control terminal is available to control 0-50-75-100% of capacities.

\*Zone Controller for residential use  
Note: Product image not to scale.

### Technical focus

- Design flexibility thanks to high static pressure and large air volume
- Accurate temperature control to reduce cold drafts during operation
- Configurable air temperature control

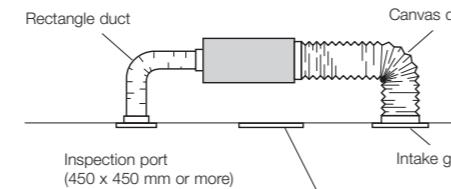

### Compact Body Size

Hidden in the ceiling, ideal when interior decor is an important consideration such as in residences with many rooms and light commercial buildings.

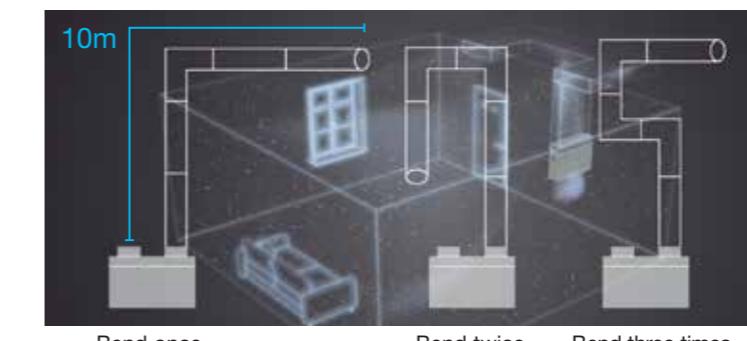

### System Example

An inspection port (450 mm x 450 mm or more) is required at the control-box side of the indoor unit body.

### Clean air. Ducts that deliver

Testing has verified that even with three bends and a total length of up to 10m, the effectiveness of nanoe™ X is maintained right through the duct to deliver clean, fresh air where it's needed.

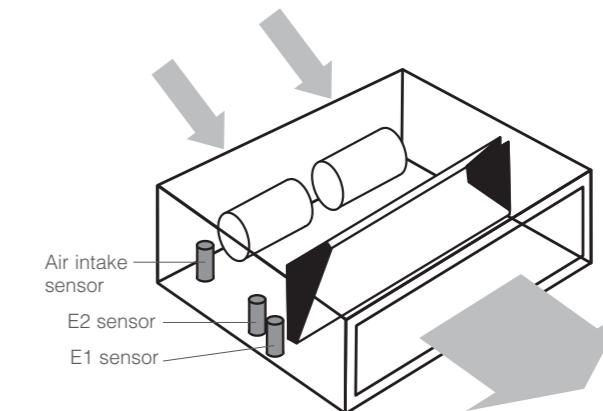

Bend once      Bend twice      Bend three times

As the experiments demonstrate; even with a total ductwork length of up to 10m, effectiveness of nanoe™ X is maintained.

Note: PF3 and PE3 (16.0kW and below) ranges only.

### Cold Drafts Reduced During Heating Operation

- Accurate temperature measurement by E1/E2 sensor to reduce cold drafts during heating operation.

## High Static Pressure Splittable Ducted

High static and large airflow ducted for exceptional installation flexibility.

S-180PE3R5B  
S-200PE3R5B  
S-224PE3R5B

\*Zone Controller for residential use  
Note: Product image not to scale.

### Technical focus

- Easy installation with splittable chassis design
- Max. 200Pa static pressure setting<sup>\*1</sup>
- Design flexibility thanks to high static pressure and large air volume
- DC motor equipped

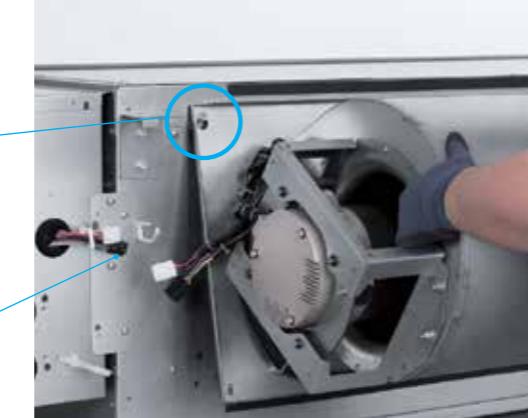

<sup>\*1</sup> In case of S-224PE3R5B

- Low power input
- Accurate temperature control to reduce cold drafts during operation
- Configurable air temperature control

### New Ducted Model Key Factors

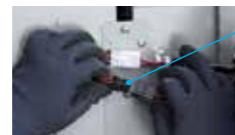

#### Bell Shaped Keyhole for Weight Support

Part of the keyhole is newly designed with a bell shape to reduce the burden of installation. It also enables temporary attachment.

#### 2 Wire Connectors for Easy Installation

With only 2 wire connectors, installation has become much easier and faster.

#### 12 Bolts & Screws for Easy Assembly

Only 12 screws and bolts need to be attached, allowing for a shorter installation time.

### Easy Assembly Steps

Assembly takes three easy steps, even in limited spaces.

1 Install the fan to the heat exchanger and tighten the screws and bolts.

2 Assemble the connectors.

3 Install the chassis and tighten the screws and bolts.

<sup>\*1</sup> The weight is for the 18.0kW model. (20.0/22.4kW : 48kg) <sup>\*2</sup> The weight is for the 18.0/20.0kW model. (22.4kW : 48kg)

Notes:

- In the case of nanoe X OFF
- In case it is necessary to indicate the air flow volume in (l/s), the value in (m<sup>3</sup>/min.) shall be multiplied by 16.7 and rounded down the decimal point.
- AEER and ACOP classification is at 230V(400V) only in accordance with GEMS2019.
- TCSPF, HSPF and Total Energy consumption indicate the value of average temperature zone.
- Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions

<sup>\*5</sup> Tubing size is Ø25.40 when the piping length is over 50m for U-180PZH2R8 and 30m for U-200PZH2R8 and U-224PZH2R8.

Also, joint needs to be prepared by the site for U-180PZH2R8 when the piping length is over 50m. Please refer to technical documents for more details.

<sup>\*6</sup> Additional gas amount is 45g/m when the piping length is under 50m and 60g/m when the piping length is over 50m.

**Indoor Unit**

High Static Pressure

# Adaptive Ducted

Control all aspects of your environment with exceptional performance and quiet operation. Vertical installation flexibility offers the perfect solution when ceiling heights are restricted.

**nanoe™ X**  
nanoe™ X as a standard\*  
\*nanoe X Generator Mark 2

**ECONAVI**

ECONAVI ready

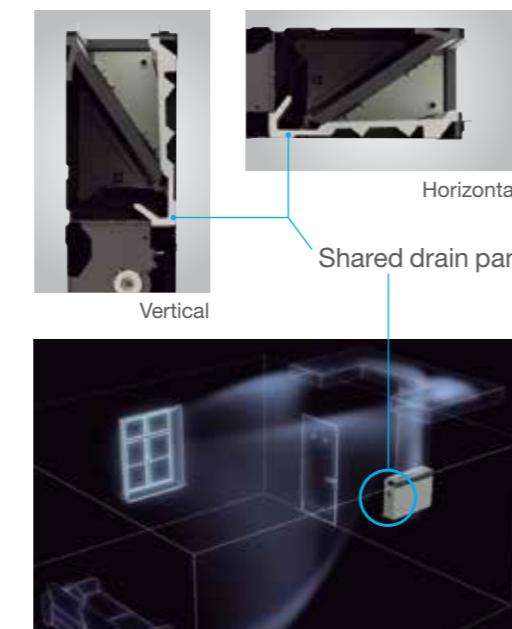

**Technical focus**

- Space saving 250mm height
- DC fan motor for variable external static pressure control
- Easy to install and maintain
- Accurate temperature control to reduce cold drafts during operation
- Configurable air temperature control

## Powerful 150Pa ESP in an industry-leading vertical installation

Our groundbreaking drain pan design delivers a ducted unit that can be mounted horizontally or vertically without the need for alterations\*. Even when ceiling space for ductwork is limited, the slim design and powerful 150Pa static pressure allow for discrete placement away from rooms for total installation flexibility.

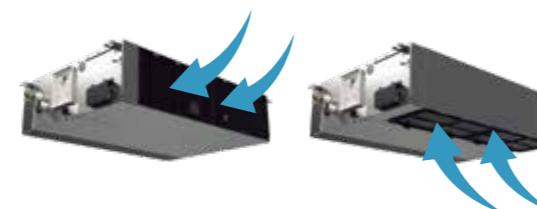

\*1 Please refer to Installation Manual for full details.

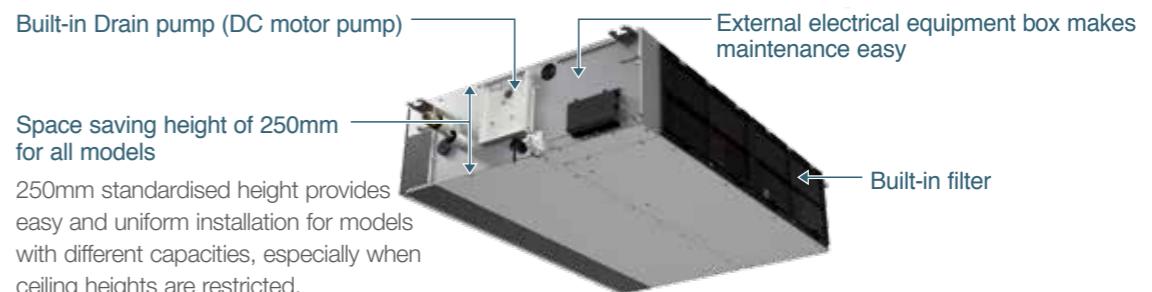

Drain pan is shared in both cases horizontal and vertical installation.

**Selectable air inlet position**

A removable panel allows air inlet position to be adjusted to enable rear or bottom entry, depending on ductwork installation.

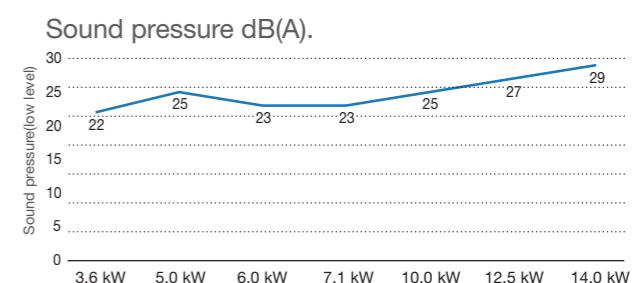

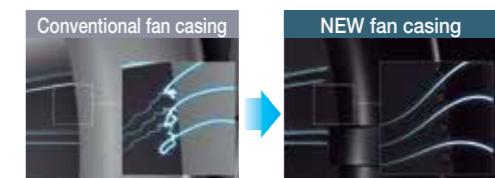

Note: PF3 range only.

## Top-class noise level performance

A proprietary improved casing design realises an even smoother airflow and low noise (22dB - 29dB) operation while effortlessly maintaining enough pressure\*2 to deliver quiet comfort ideal for hotel and guest rooms.

\*2 Operating at 50Pa static pressure in Low fan mode.

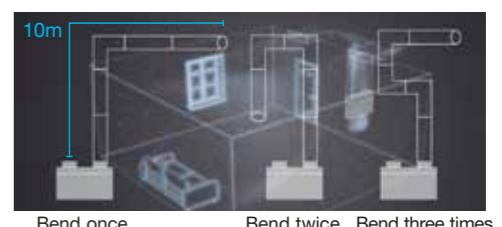

## Superior air quality

**nanoe™ X**

The new ducted models are equipped with nano™ X as standard, an unique air quality improvement technology producing twice the amount of hydroxyl radicals compared to previous generations. Combined with the strong static pressure this ensures pristine nano™ X air travels unaffected even through multiple duct shapes at lengths of 10m, as well as making them ideal for use in larger spaces.

Note: PF3 and PE3 (16.0kW and below) ranges only.

Bend once      Bend twice      Bend three times  
Based on in-house test result, even with a total ductwork length up to 10m, effectiveness of nano™ X is maintained.

- Notes:
- In the case of standard installation (Horizontal installation in the ceiling, rear side air intake)
  - In the case of nano X OFF
  - In case it is necessary to indicate the air flow volume in (l/s), the value in (m<sup>3</sup>/min.) shall be multiplied by 16.7 and rounded down the decimal point.
  - AEER and ACOP classification is at 230V(400V) only in accordance with GEMS2019.
  - TCSPF, HSPF and Total Energy consumption indicate the value of average temperature zone.
  - Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions
  - H : High at setting 5 stage (Level 5), M : Middle at setting 5 stage (Level 3), L : Low at setting 5 stage (Level 1) Noise of L is indicated by the values at FAN mode.
- \*1 For piping connection for 6.0kW unit, connect the gas socket tube (Ø12.7-Ø15.88) to the gas tubing side indoor unit and connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.
- \*2 For piping connection for 7.1kW unit, connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.

# Indoor Unit

# Ultra Slim Ducted

With a height of only 200 mm, it provides greater flexibility and adaptability for various applications. In addition, high efficiency and extreme low noise level make it highly suitable for apartments and hotels.

Wired remote controller included.

Note: Product image not to scale.

CZ-TACG1\*1

## Technical focus

- Space saving 200mm height
- Rear or Bottom Return Air Options
- Built-in Drain Pump
- DC fan motor greatly reduces power consumption
- Easy maintenance and service by external electrical box
- 40 Pa static pressure enables ductwork to be fitted.

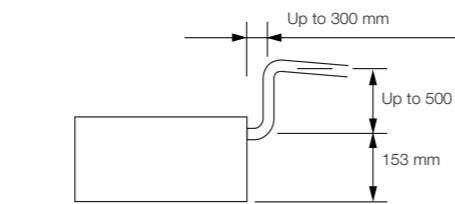

## Ultra-slim profile for all models

200mm height for all models allows installation in very narrow ceilings.

## Drain pump with increased power

Using the built-in high-lift drain pump, the drain piping rise height can be increased to 653 mm from the lower surface of the body.

### Notes:

The Rated Capacity, Power Input and Running Current are measured in accordance with AS/NZS 3823

• Cooling: Indoor temperature: 27°C DB/ 19°C WB, Outdoor temperature: 35°C DB/ 24°C WB

• Heating: Indoor temperature: 20°C DB/ 15°C WB, Outdoor temperature: 7°C DB/ 6°C WB

• Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions

• Sound levels are measured in default status which is rear return air, when changing to bottom return air, sounds levels may be higher.

• Ultra Slim Ducted is not supported by PAC Smart Connectivity+.

\*1 If you connect WLAN adaptor (CZ-TACG1) to an indoor unit other than wall mounted type and operate from the smartphone with Panasonic Comfort Cloud App, airflow direction may not be operated as it is shown on the display.

# Indoor Unit 4-WAY Cassette

Featuring uniform cooling, easy installation, and with a sleek exterior, this unit is the perfect match for all commercial applications.

- Self-diagnosing Function
- Automatic Fan Operation
- DRY Dry Mode
- Intelligent Auto Swing
- Automatic Restart Function
- Auto Swing (Auto Flap Control)
- Built-in Drain Pump
- DC Motor

AIR INTAKE CHAMBER

- 1 Air intake flange (ø100) (field supply).
  - 2 Air intake box CZ-ATU2<sup>\*1</sup> for Air intake plenum.
  - 3 Air intake plenum CZ-FDU3
- \*1 When using Air intake box (CZ-ATU2), Air intake plenum (CZ-FDU3) required.

PANEL (CZ-KPU3H/3A)

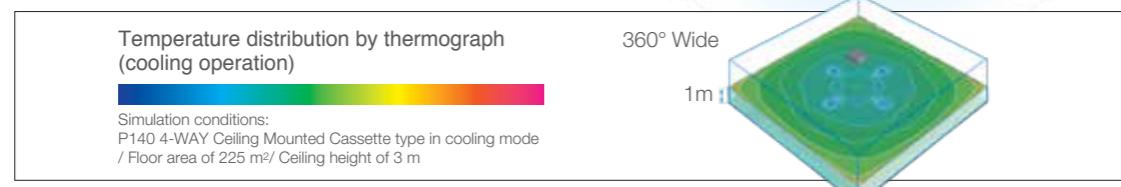

Normal Panel : CZ-KPU3H  
ECONAVI Panel : CZ-KPU3A

## Technical focus

- |   |                                      |
|---|--------------------------------------|
| • Compact design                        | • Lightweight design                 |
| • Low sound levels                      | • Fresh air knockout                 |
| • DC fan motor for increased efficiency | • Branch duct connection             |
| • Powerful drain pump gives 850 mm lift | • Optional air-intake plenum CZ-FDU3 |

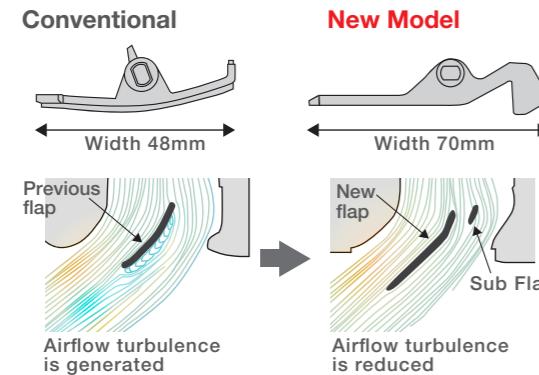

## 360° Wide & Comfortable Airflow

Our design features wide-angle outlets and flaps that were designed through expert mechanics and prototype tests. Air from the centre is sent farther and the air blown out of the larger, side flaps spreads throughout the room. The air comes from all four sides of the unit and expands gently in a circle centred on the indoor unit.

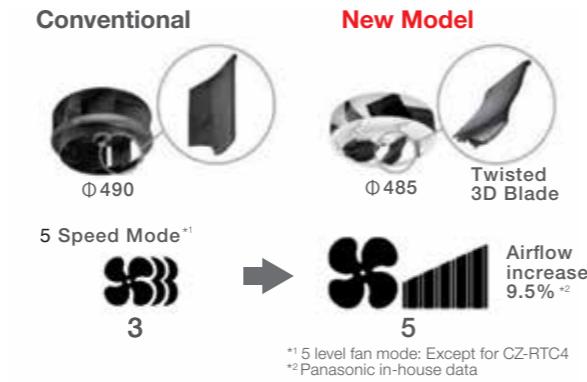

## Wide Flap

Adding a sub flap and widening the main flap have reduced turbulence and increased airflow. Also, setting the jetting port at a wider angle allows the airflow to reach the corners of the room more quickly.

## 3D Turbo Fan

Using a twisted 3D blade made the unit slimmer and more compact, while also increasing the airflow. A 5-Speed mode allows the airflow to be adjusted in 5 steps to suit the situation.

## High-Ceiling Installation (Up to 5 m for 10.0kW+ models)

The units can be installed in rooms with high ceilings, where they provide ample floor-level heating in the winter. (See ceiling height guidelines below.)

High Ceiling (Factory settings)		
New model	Capacity	
	6071PU	1014PU

Industry's top-class			
Capacity	4-way discharge high ceiling setting 2	3-way discharge with the optional air-blocking materials	2-way discharge with the optional air-blocking materials
1014PU	Up to 5.0m	Up to 4.7m	Up to 5.0m

## Ceiling height guidelines

Indoor unit	4-way discharge			3-way discharge (optional air-blocking materials)	2-way discharge (optional air-blocking materials) <sup>*4</sup>
	Standard (Factory setting)	High ceiling setting 1	High ceiling setting 2		
6071PU	3.0	3.3	3.6	3.8	4.2
1014PU	3.6	4.3	5.0	4.7	5.0

<sup>\*3</sup> When using the unit in a configuration other than the factory settings, it is necessary to make settings on site to increase airflow.

<sup>\*4</sup> Use air-blocking materials (CZ-GFU3) to completely block two discharge outlets for 2-way airflow.

Notes:

- In the case of nanoe X OFF
- In case it is necessary to indicate the air flow volume in l/s, the value in (m³/min.) shall be multiplied by 16.7 and rounded down the decimal point.
- AEER and ACOP classification is at 230V(400V) only in accordance with GEMS2019.
- TCSPF, HSPF and Total Energy consumption indicate the value of average temperature zone.
- Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions.
- H:High at setting 5 stage (Level 5), M:Middle at setting 5 stage (Level 3), L:Low at setting 5 stage (Level 1)

\*1 For piping connection for 6.0kW unit, connect the gas socket tube (Ø12.7-Ø15.88) to the gas tubing side indoor unit and connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.  
 \*2 For piping connection for 7.1kW unit, connect the liquid socket tube (Ø6.35-Ø9.52) to the liquid tubing side indoor unit.

# Indoor Unit

# Low Profile Mini Cassette

Redesigned for a lower vertical profile, it fits easily into a standard 60 x 60cm ceiling grid without the need to alter bar configuration. This makes the Low Profile Mini Cassette ideal for small commercial and retrofit applications, in particular those with lower ceilings.

## Technical focus

- Market-leading energy efficiency
- Compact design (230mm High)
- Easy installation
- Built-in drain pump
- Mini cassette fits into a 600 x 600mm ceiling grid

- Powerful drain pump gives 850mm lift
- DC fan motor with variable speed and a new heat exchanger ensures efficient power consumption
- Multi-directional air flow

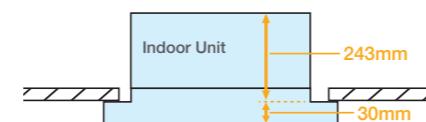

## Compact, stylish design

Thanks to advanced Panasonic design the panel is a compact 625 x 625mm, offering elegant, unobtrusive installation even where space is limited.

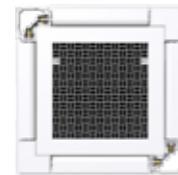

## Lighter and slimmer for easier installation

When only 230mm of indoor body height, it can easily fit in limited spaces and tight spots.  
(Required 243mm from bottom of panel to top of the unit)

## Individual flap control

Keep everyone comfortable by directing air where it's needed and away from where it isn't with individual flap control.

## A drain height of up to 850mm from the ceiling surface

The internal pump allows the drain pipe to be elevated up to 850mm above the base of the unit.

## Compact Looking, Stylish, One-motion Design

With its streamlined, one-motion form, the unit looks thin and compact when installed for a neat appearance in any room.

When not operating, the louver closes to provide an elegant look while also keeping the unit clean.

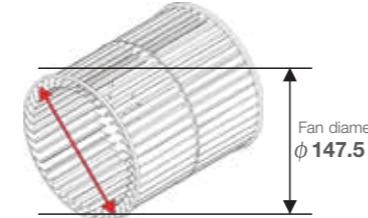

## Energy-saving Technology Delivering Top-class Efficiency

Optimisation of the shape of the casing and fan assures bigger air flow and higher efficiency.  
Energy-saving performance is top class in the industry.

## Technical focus

- Closed discharge port when not in use
- Lighter and smaller units make installation easy
- Quiet operation
- Smooth and durable design

- Piping outlet in six directions
- Washable front panel
- Air distribution is automatically altered depending on the operational mode of the unit

## Closed discharge port

When the unit is turned off, the flap closes completely to prevent entry of dust into the unit and to keep the equipment clean.

## Piping outlet in six directions

Piping outlet is possible in the six directions of right, right rear, right bottom, left, left rear, left bottom, making installation easier.

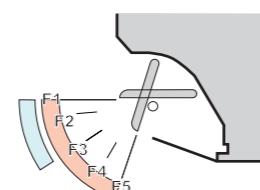

## Washable front panel

The indoor unit's front panel can be easily cleaned for trouble-free maintenance.

## Air distribution is automatically adjusted depending on the operational mode of the unit

Air outlet angle is automatically adjusted for cooling and heating operation.

Heating: F1 to F5  
Cooling: F1 to F3

Notes:

- In the case of nanoe X OFF
- In case it is necessary to indicate the air flow volume in (l/s), the value in (m³/min.) shall be multiplied by 16.7 and rounded down the decimal point.
- AEER and ACOP classification is at 230V(400V) only in accordance with GEMS2019.
- TCSPF, HSPF and Total Energy consumption indicate the value of average temperature zone.
- Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions
- H:High at setting 5 stage (Level 5), M:Middle at setting 5 stage (Level 3), L:Low at setting 5 stage (Level 1)

# Floor Console

This floor-type console's slender profile integrates unobtrusively into any interior, in a position that's also ideal when you want to warm your feet when it's cold.

CZ-TACG1\*1

Note: Product image not to scale.

## Technical focus

- A breakthrough design that integrates perfectly with the most modern environments.
- Compact design fits 50mm wall recess

## Upper & Lower Vane Blow

Optimum air flow from the top and bottom of the unit assures that even your feet are kept comfortably warm. (Only during heating)

## Compact Design

The design features a flat, elegant front panel that provides a neat appearance and the unit can be recessed into a wall up to 50mm.

## Super Quiet

The indoor and outdoor units deliver quiet operation and pressing the Quiet mode button lowers operation noise even further to just 19dB for indoor unit with low fan speed.

19dB\*1  
Indoor

\*1 CS-Z25UFRAW & CS-Z35UFRAW: In the Quiet mode during heating operation with low fan speed.

Current (rated)	Cooling : Heating A 2.40 : 3.40   2.30 : 3.25	3.90 : 4.80   3.70 : 4.60	6.20 : 6.60   6.00 : 6.40
Dimensions	H x W x D mm	542 x 780 x 289	619 x 824 x 299
Net weight	kg	33	35
Piping connections	Liquid / Gas m Ø6.35 / Ø9.52	Ø6.35 / Ø9.52	Ø6.35 / Ø9.52
Pipe length	min. - max. m	3 - 20	3 - 30
Elevation difference	m	15	20
Piping connections	Cooling : Heating °C -10 to 46 : -15 to 24	-10 to 46 : -15 to 24	-10 to 46 : -15 to 24

Notes:

The Rated Capacity, Power Input and Running Current are measured in accordance with AS/NZS 3823

• Cooling: Indoor temperature: 27°C DB/ 19°C WB, Outdoor temperature: 35°C DB/ 24°C WB

• Heating: Indoor temperature: 20°C DB/ 15°C WB, Outdoor temperature: 7°C DB/ 6°C WB

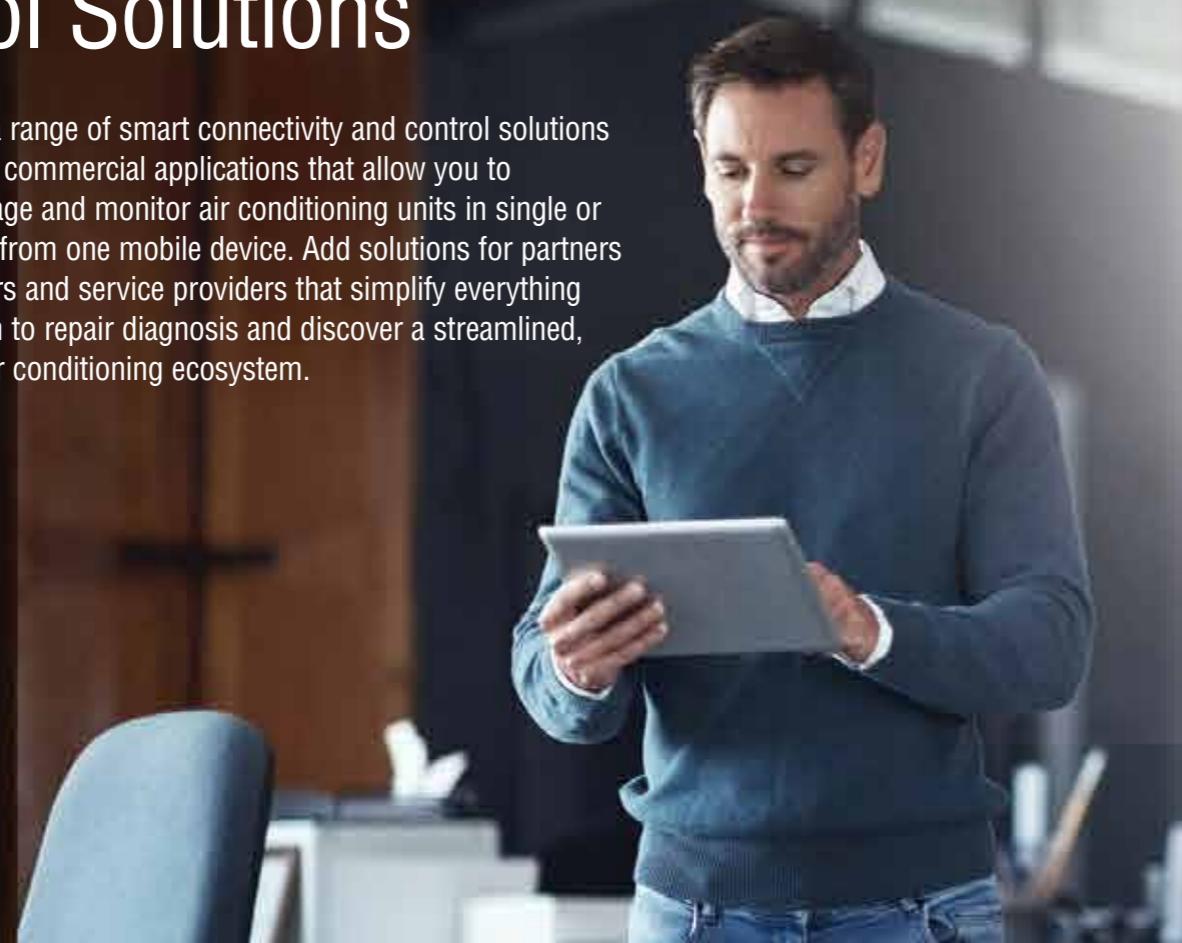

• Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions.

• Floor console is not supported by PAC Smart Connectivity+.

\*1 If you connect WLAN adaptor (CZ-TACG1) to an indoor unit other than wall mounted type and operate from the smartphone with Panasonic Comfort Cloud App, airflow direction may not be operated as it is shown on the display.

# Smart Connectivity and Control Solutions

Panasonic offers a range of smart connectivity and control solutions for residential and commercial applications that allow you to conveniently manage and monitor air conditioning units in single or multiple locations from one mobile device. Add solutions for partners such as contractors and service providers that simplify everything from configuration to repair diagnosis and discover a streamlined, next-generation air conditioning ecosystem.

## Wide Range of Smart Control Solutions for All Needs

Whether you're a contractor or service provider looking for solutions to streamline everything from configuration to repair diagnosis, a facility manager overseeing multiple sites or a single office, or you're simply managing a home system, we offer a range of innovative, next-generation smart control solutions to suit your needs.

**For end users and facility managers**

**Panasonic Comfort Cloud**  
 Intuitive and scalable air conditioning control solution using a personal mobile device.

**PAC Smart Connectivity+**  
 Offers efficient energy management with high indoor air quality(IAQ) control.

**For contractors/service providers**

**H&C Diagnosis APP**  
**H&C Control APP**  
 Connect to APP via Bluetooth for greatly improved convenience during configuration and repair diagnosis.

**For Residential**

**Panasonic Comfort Cloud**  
**Home Automation Ready**

**For Light Commercial**

**Panasonic Comfort Cloud**  
**PAC Smart Connectivity+**

**For Multiple Building Management**

## Personal Control Solutions Panasonic Comfort Cloud

### Remotely manage and monitor multiple air conditioning units in your home

Easily control and access all features of the air conditioning units with smart centralised control.

### Intuitive voice control

Control air conditioning units by voice command connecting to smart speaker.

### PLUG & PLAY FOR HOME AUTOMATION

Easily connect with integrated controllers to become part of your automated home network.

Note: For further information, please check CLIPSAL® website.

## Cost Effective Energy Management Solution

### Multiple location control at your convenience with Comfort Cloud

Gain control of multiple zones and sites intuitively adjusting temperature by areas with differentiated user rights settings.

### Indoor Air Quality(IAQ) and efficient energy usage with PAC Smart Connectivity<sup>+</sup>

- Ultimate cooling comfort with sensing technology and automatic IAQ control.
- Simplified Plug & Play installation with BMS connection for better energy consumption.

## Full Control of All Installations From A Single Internet Connection Panasonic AC Smart Cloud

### Manage and monitor energy consumption patterns

Analyse energy usage, running time and optimise temperatures to reduce energy costs.

### Centralised control solution with zero downtime

Receive real-time status updates to prevent breakdowns.

### Flexible and scalable solution for expanding businesses and multi sites

Adaptable solutions that can easily be upgraded for new features, meet user demand and better IT management.

\*1 CZ-TACG1 or CZ-CAPWFC1 Network Adaptor required per unit. Requires an Internet connection and the App downloaded from the App Store or GooglePlay Store on your smartphone or tablet with the latest Operating System available. To use Amazon Alexa to control your air conditioner, you will need an Amazon Echo device. To use Google Assistant to control your air conditioner, you will need an Google Assistant device. Google is a trademark of Google LLC. Amazon, Alexa and all related logos are trademarks of Amazon.com, Inc. or its affiliates. Google Home and Alexa are compatible with the air conditioning systems shown on pages 4 and 5. Google and Alexa functionality is only available with complete air conditioning systems (including Panasonic controllers).

# Panasonic Comfort Cloud

Control air conditioning units from wherever and whenever with your smartphone, by using Panasonic Comfort Cloud and WLAN smart adaptor.

This scalable solution is ideal for one system, one site or multiple locations. Coupling the adapter with the already feature rich systems, makes it an ideal solution for both residential and commercial applications.

## For Residential

Remotely manage and monitor air conditioning units from anywhere anytime.

## For Light Commercial

Gain control of multiple zones and sites intuitively up to 200 indoor units.

## Panasonic Comfort Cloud features

### Voice Control

Control air conditioning units by voice command intuitively connecting to smart speaker.\*1

### From 1 to 200 Units

User can control up to 200 indoor units. 10 different sites, with up to 20 units / groups per site.

### Easy Scheduling

Complex weekly scheduling made simple. Not only for one units, but across multiple sites and from a smartphone.

Custom timer according to your working day and hour

### Multiple User

The Panasonic Comfort Cloud App allows multiuser access control. Restrict user access to specific units.

### Energy Monitor

See the estimated power consumption and compare with other periods to see how energy bill can be reduced even more.\*2

### Error Codes

Error code notification through the App, provides early notification and allows for faster repair.

## Application Examples

Centralised control from reception.

Multiple location control for small business.

## System Configuration

### Network Adaptor

CZ-TACG1 CZ-CAPWFC1

CZ-TACG1: For products for small sized project.  
CZ-CAPWFC1: Available for all types of VRF and PAC indoor unit.

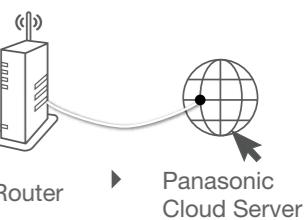

### Connection Diagram

Indoor Unit

In conformity with IEEE 802.11

Panasonic Cloud Server

## WLAN Smart Adaptor Specification

CZ-TACG1	CZ-CAPWFC1
Input Voltage	DC 12V (Supplied from indoor unit)
Power Consumption	Maximum 0.66W
Size [H x W x D]	66 x 36 x 12mm
Weight	Approx. 85g
Interface	Wireless LAN
Wireless LAN Standard	IEEE 802.11 b/g/n
Frequency range	2.4GHz band
Encryption	WPA2-PSK(TKIP/AES)
Operation range	0-55°C, 20 - 80RH%

\*1 CZ-TACG1 or CZ-CAPWFC1 Network Adaptor required per unit.  
Requires an Internet connection and the App downloaded from the App Store or Google Play Store on your smartphone or tablet with the latest Operating System available.  
To use Amazon Alexa to control your air conditioner, you will need an Amazon Echo device.  
To use Google Assistant to control your air conditioner, you will need an Google Assistant device.  
Google is a trademark of Google LLC.  
Amazon, Alexa and all related logos are trademarks of Amazon.com, Inc. or its affiliates.  
Google Home and Alexa are compatible with the air conditioning systems shown on pages 4 and 5.  
Google and Alexa functionality is only available with complete air conditioning systems (including Panasonic controllers).  
\*2 Function available depending on the model.

Comfort Cloud App

Download on the App Store  
GET IT ON Google Play

### Compatible Device and Browsers

1. iOS 9.0 or above
2. Android 5.0 or above

# Plug & Play for Home Automation

Easily connect with integrated controllers to become part of your automated home network. Plug & Play with Clipsal solutions to enjoy simplicity you've been waiting for, empowering you to take control of your home's technology.

## Panasonic

## Schneider Electric

Panasonic partnering with Schneider Electric offering home automation solution with CLIPSAL interfaces and devices.

## CLIPSAL®

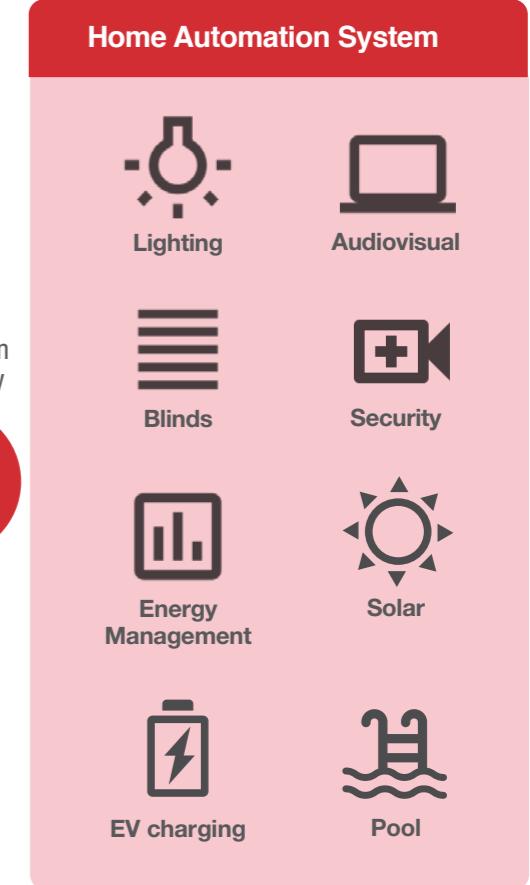

by Schneider Electric

### Easy Design / Plug & Play

Clipsal control solution brings you smart home technologies and enables you to control devices at your fingertips from any smart phone or tablet. Panasonic air conditioners are ready for this smart home automation with just plug-and-play connectivity.

Applies to selected Panasonic Air Conditioning systems only, please consult with Panasonic for more details.

### Case Study

Panasonic VRF system was selected for the smart apartments, Lilydale Grove, which integrates robust automation technology to simplify your life. While other air conditioner brands need an adaptor to connect to HEMS, Panasonic can seamlessly connect with Schneider's Home automation, one of the market leaders in the HEMS industry.

•Air conditioning system	FSV Heat Recovery (20 systems) FSV Heat Pump (4 systems)
•Cooling Capacity	742kW
•Indoor units	278 units
•Control System	SE8000 series 278units

# PAC Smart Connectivity+

Through thorough energy management, Panasonic's PAC Smart Connectivity+<sup>\*1</sup> is a completely new, state-of-the-art solution providing energy saving and comfort as well as simple installation, operation and maintenance.

## PAC Smart Connectivity+

PAC Smart Connectivity+ offers efficient energy management and a new air conditioning control solution with high IAQ (Indoor Air Quality).

### Energy Management System for Rooms

Each room is monitored by high-precision sensors, making it possible to make every room's temperature comfortable without wasting energy.

### Management System for the Entire Building

A Building Energy Management System (BMS) can also be connected for Plug & Play centralised control of the building's entire energy consumption.

## Advantages

### Dramatic Reduction of OpEx with Outstanding IAQ.

- 3 Built-in sensors: Temperature, RH and Occupancy
- ZigBee wireless sensors: CO<sub>2</sub>/Temperature/RH%, window/door, ceiling/wall

### User-/Owner-friendly.

- Colour touch screen
- Ease and simply of use
- 22 Languages
- Easy-to-understand error description

### Ultimate Customisation.

- Background colour customisable
- Custom display/icons, messages
- Programmable logic (also standalone)
- Various controls and various external connection devices

### Easy Design and Plug and Play to Reduce CapEx.

- Simple Plug & Play connection to Building Energy Management System (BMS)
- Stand alone or BMS connected
- Easy Installation of Zigbee Sensors

## PAC Smart Connectivity+ ~New SE8000 series~

### 1. Quality Air Control

Optimum IAQ is realized using the CO<sub>2</sub> & humidity sensors. The interior remains comfortable, while heating and cooling costs are minimized.

The CO<sub>2</sub> sensor controls ventilation systems which contributes to improving the room's air quality.

### 2. Room Key Card or Key Cardless Solutions for Hotels

Solutions are provided that meet the needs of various regions and hotel grades. Whilst the previous model's automatic detection function offered optimal air conditioning with or without a hotel room key card, the latest model enables conventional key cards to control air conditioners and other devices coordinately. The increase in the types of devices that can be connected enables customized control of any hotel room.

### 3. Other Equipment Control

One room controller manages various devices including lighting and the blinds. A ventilation system and other external connection devices can be connected by using HRC<sup>\*2</sup> or SE8350 so that various control is possible with this controller alone, even without BMS.

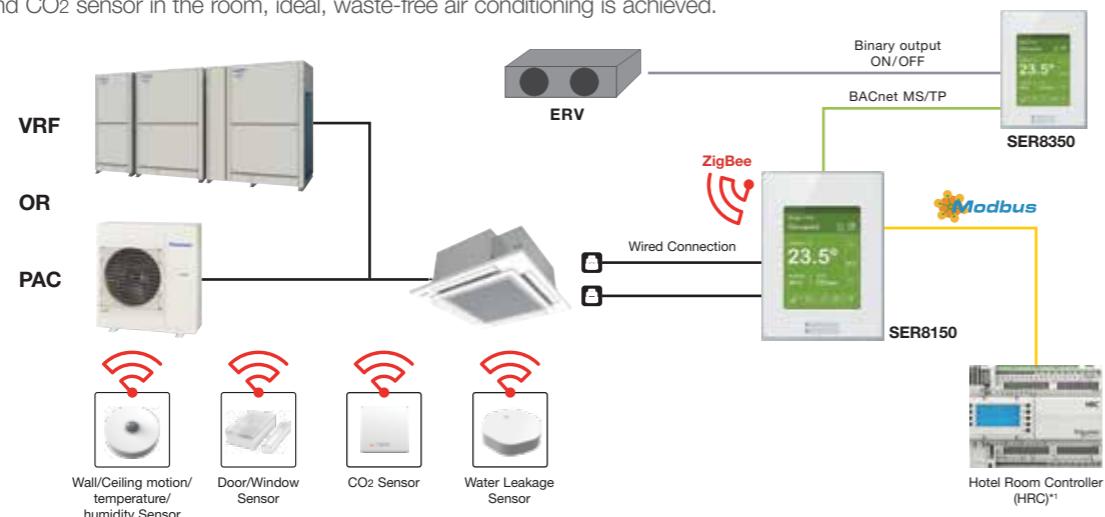

<sup>\*1</sup> Not compatible with Ultra Slim Ducted, 4-Way Mini Cassette and Floor Console systems.

<sup>\*2</sup> Available through a Schneider Electric distribution channel.

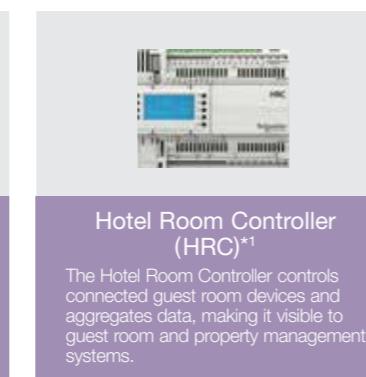

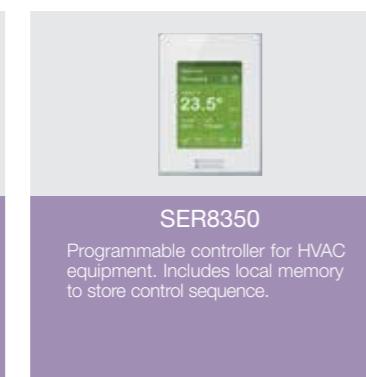

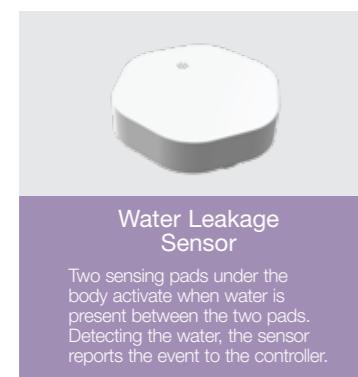

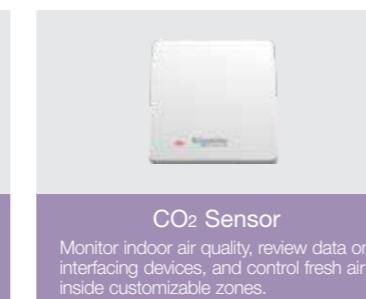

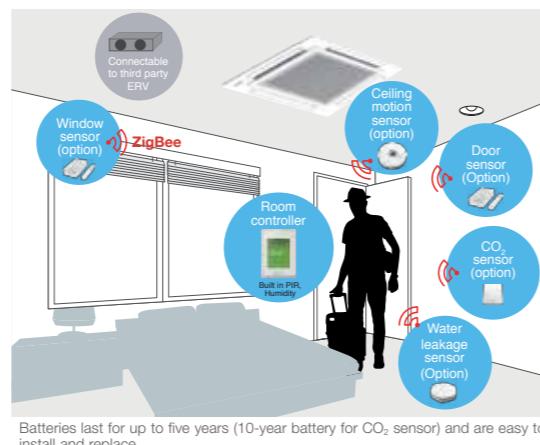

## Energy Management System for Rooms

By installing a ceiling motion sensor, wall motion temperature sensor, window/door sensor, and CO<sub>2</sub> sensor in the room, ideal, waste-free air conditioning is achieved.

### Sensing & Control technology

Using sensors from Schneider Electric, high-quality occupancy control and automatic IAQ control were realised. The sensors detect the presence or absence of occupants, and the opening and closing of doors and windows to achieve the most efficient energy management for exceptional air-conditioned comfort. Flexible installation is possible to match different applications and building features such as walls, ceilings and proximity to doors and windows. No wiring means extra installation versatility.

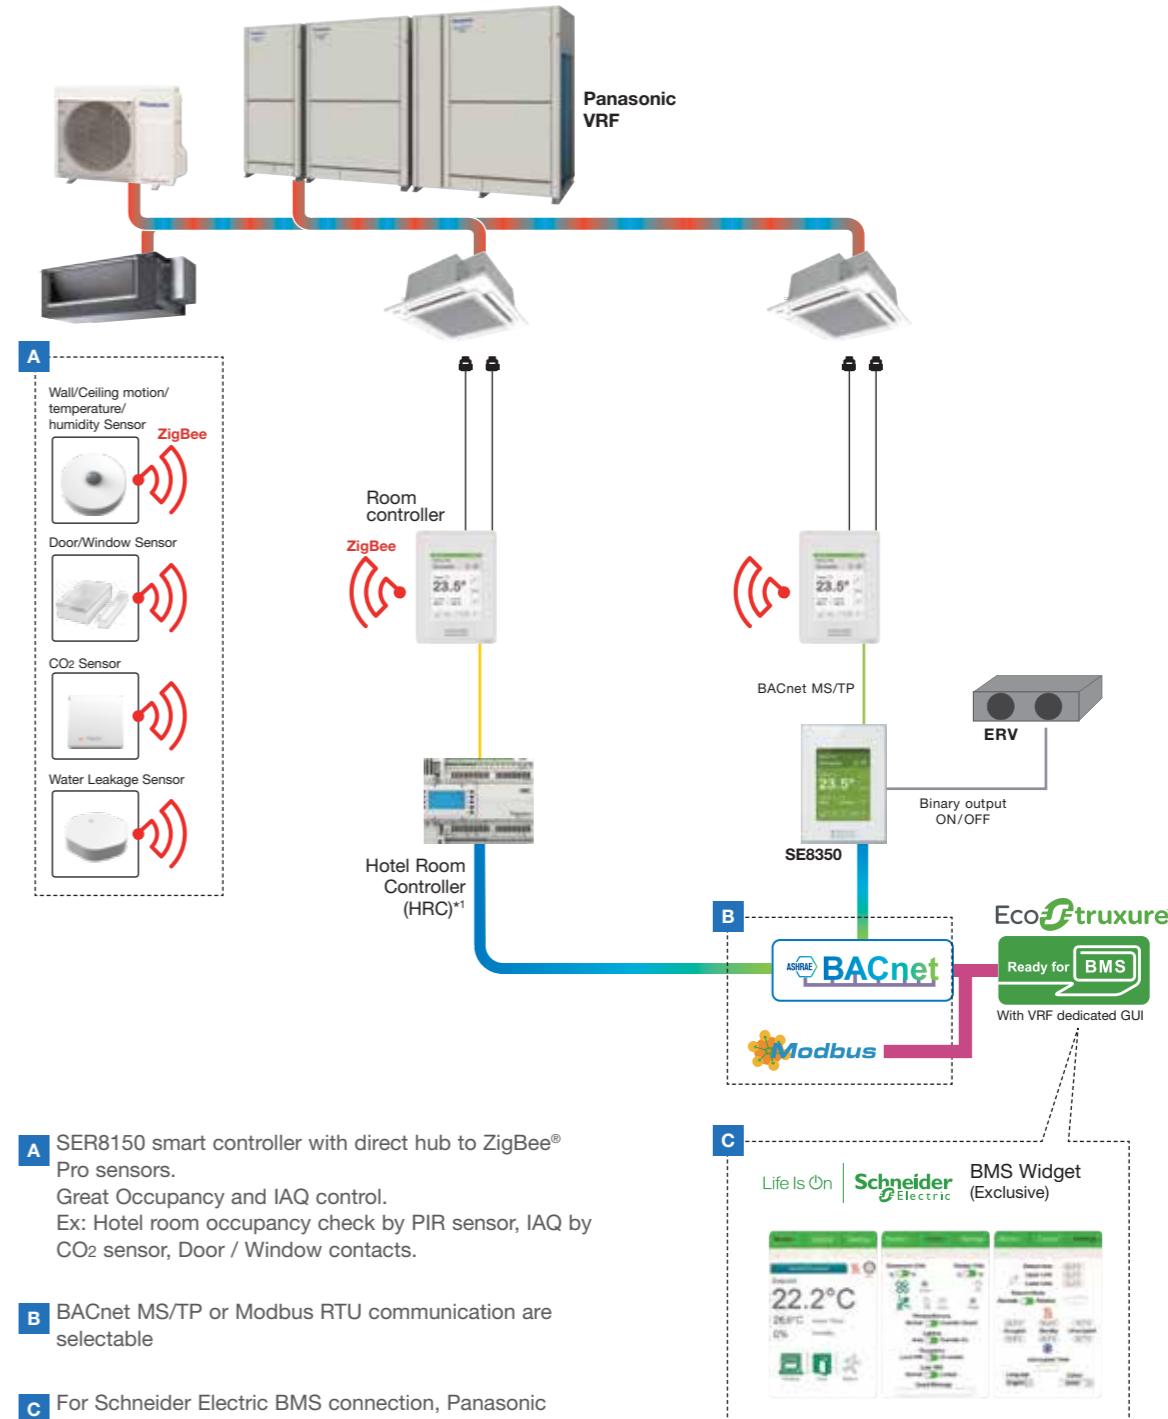

## Management System for the Entire Building\*<sup>2</sup>

The smarter solution to simplify energy management, optimise building efficiency and drive savings.

### Plug and Play BMS connection.

With the SER8150, connection to BMS is extremely easy. Better still, a remote controller is all that's needed to enable use as a stand-alone system. In addition to dramatically reducing the burden on system integrators, this cuts costs.

**A** SER8150 smart controller with direct hub to ZigBee® Pro sensors.  
Great Occupancy and IAQ control.  
Ex: Hotel room occupancy check by PIR sensor, IAQ by CO<sub>2</sub> sensor, Door / Window contacts.

**B** BACnet MS/TP or Modbus RTU communication are selectable

**C** For Schneider Electric BMS connection, Panasonic VRF widgets enable easy Plug and Play.  
Better understanding for VRF as a chiller system.

\*1 Available through a Schneider Electric distribution channel.

\*2 Graphic shows combination of products from Panasonic, Schneider Electric and others. Currently, some products might not available in Australia, please consult authorised dealer for more details.

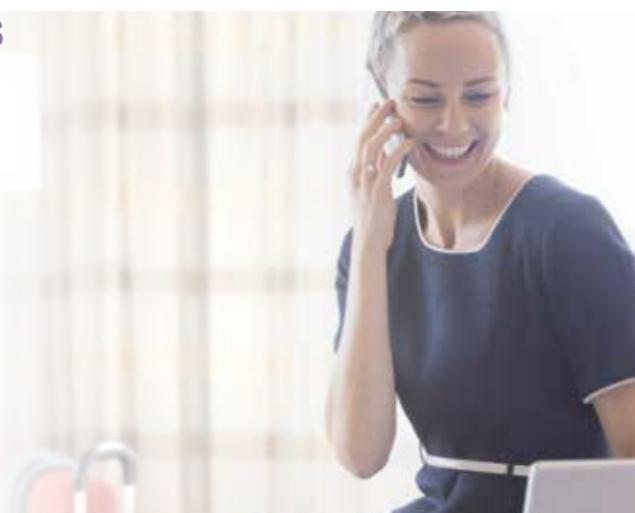

## Smart Management Solutions

### 1 Hotels

#### Room Key Card or Key Cardless

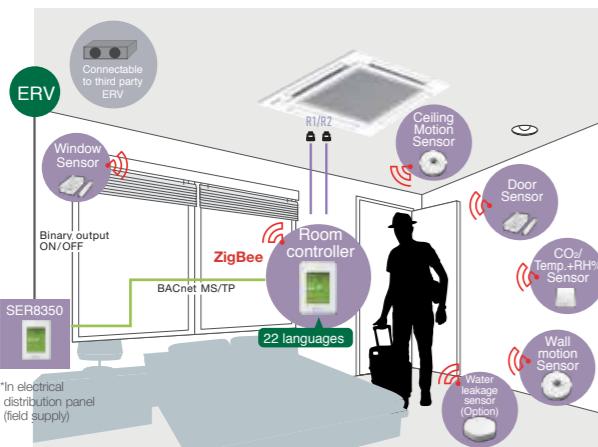

##### Solutions for Hotels

The SER8150 and ZigBee Sensor automatic detection function offer optimal air conditioning regardless of whether there is a hotel room key or not. Sensors detect the presence or absence of occupants and the opening and closing of doors and windows for the optimum air-conditioned environment guests expect. Automatic control ensures the most efficient operation when guests are away or when windows are open. This contributes to an appreciable reduction in operation costs.

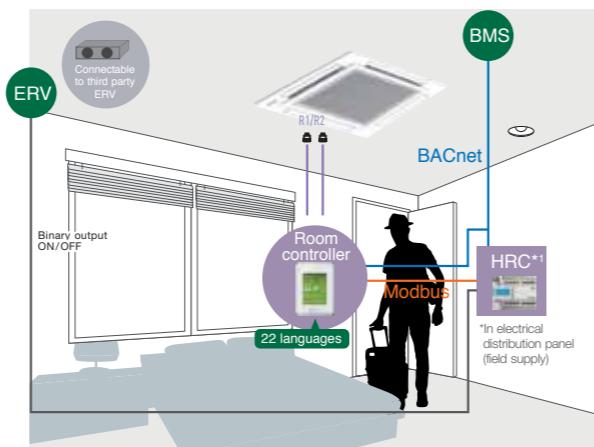

#### 1. Remote sensing & IAQ control

In addition to detecting a room's temperature, humidity and CO<sub>2</sub> concentration, ZigBee remote sensors detect the opening/closing of windows and doors, and the presence/absence of people in a room. Various IAQ controls and detailed energy savings are possible by using SE8350 based on this detected information.

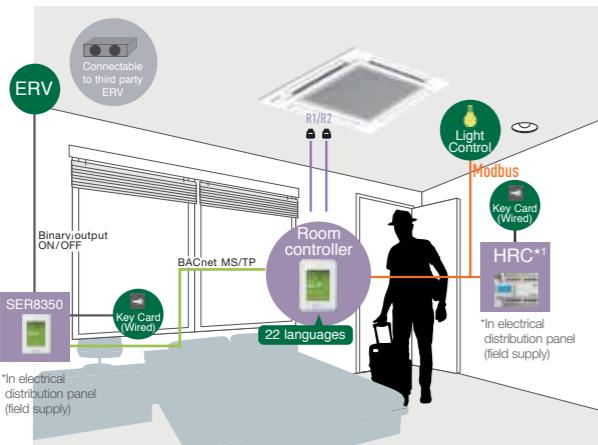

#### 2. BMS connectivity

By setting HRC\*1 as the guestroom controller, sensing, control and BMS connection can be realized in coordination with SER8150!

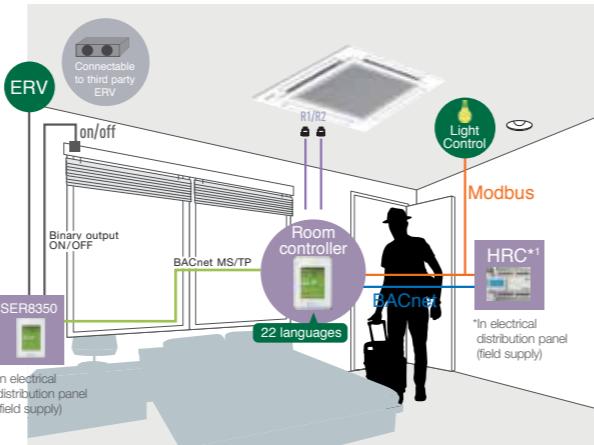

#### 3. Key Cardless control

The introduction of SE8350 and HRC enables conventional wired keycards to be connected to the system so that it is possible to meet the specific requirements of various hotel and room types.

#### 4. Other control

The introduction of SE8350 and HRC enables the on/off control of devices having dry contact input, such as ventilation, lighting and blinds.

### 2 Small and Medium Offices

#### CO<sub>2</sub> sensors (option) and Humidity sensors

CO<sub>2</sub> sensors (option) take measurements in units of ppm, and humidity sensors enable fine air quality control. This creates the most comfortable space for occupants while contributing to improved employee satisfaction.

### 3 Super Markets

#### Humidity sensors

Humidity sensors enable automatic dehumidification for the optimum IAQ regardless of climatic conditions. This creates an even more comfortable environment for customers, employees, and products themselves.

## Innovative and Unrivalled Advantages

### Colour and Design to Match Office Interiors

Colour combinations and design can be set to match different facilities.

### Customisation in 22 Languages Possible

The display can be customised to match the native languages of guests to enable smooth, stress-free communication for hospitality at its finest.

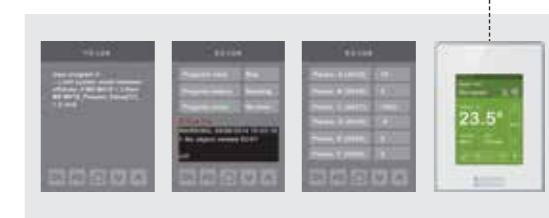

### Easy-to-Understand Error Description

Error description during an emergency is easy to understand, enabling staff to respond quickly.

### Programmable Logic

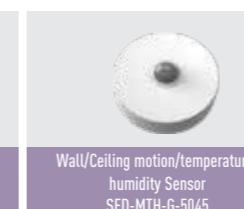

Full customisation of remote control logic possible, and updating to match conditions.

## Smart Connectivity Devices

Door/Window Sensor  
SED-WDC-G-5045

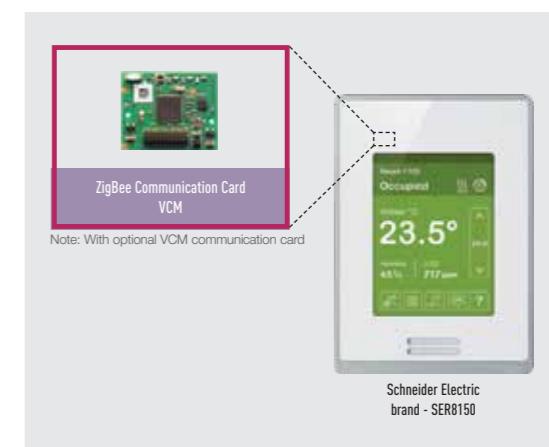

Wall/Ceiling motion/temperature/  
humidity Sensor  
SED-MTH-G-5045

CO<sub>2</sub> Sensor  
SED-CO-G-5045

Water Leakage Sensor  
SED-WLS-G-5045

### Features

- Up to 5-year battery life batteries included (CO<sub>2</sub> sensor is 10 years)
- Battery level is a point
- Sensor points visible when SER8150 is integrated via BACnet MS/TP
- Sensor status and battery level visible when SER8150 is integrated via ZigBee® Pro

# Panasonic AC Smart Cloud

With Panasonic AC Smart Cloud, have your business under control, and start saving!

## Flexible and scalable solution

- Energy saving
- Zero downtime
- Site(s) management

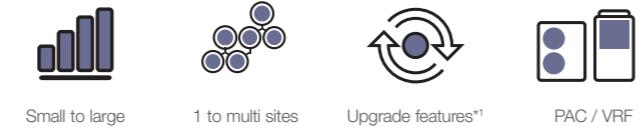

Centralise control of your business premises, from wherever you are, 24/7/365. It doesn't matter how many sites you have, or where they are!

The AC Smart Cloud system from Panasonic allows you to have complete control of all your installations, from your tablet or from your computer.

In a simple click, all your units from several locations, receive status updates in real-time of all your installations, preventing breakdowns and optimising costs.

### Scalable solution for your business.

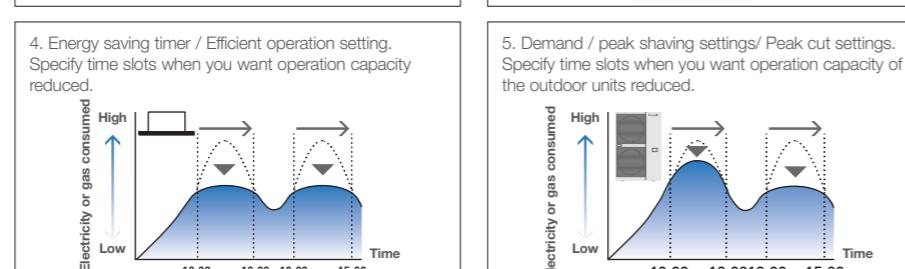

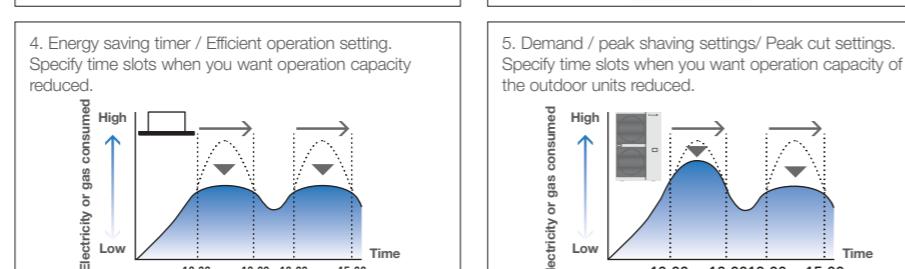

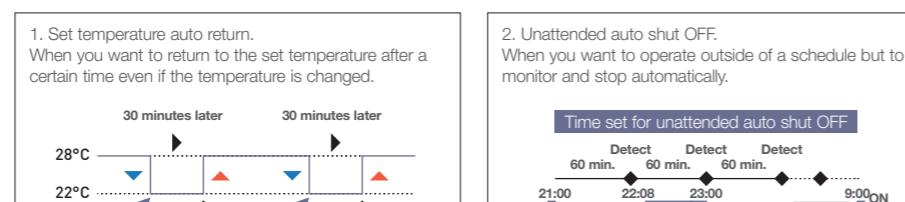

\*1 Customised to meet user demand / Continuous upgrades: new functions and product introductions / IT smart management.

## Panasonic AC Smart Cloud offers continuous improvement always thinking about users

### New e-CUT function

E-CUT functions are newly available in Panasonic AC Smart Cloud.

5 energy saving settings reduces automatically its energy consumption.

## Key functions and uniqueness

### Multi sites monitoring

• It doesn't matter how many sites you have, easy to manage, operate, compare sites, locations, rooms.

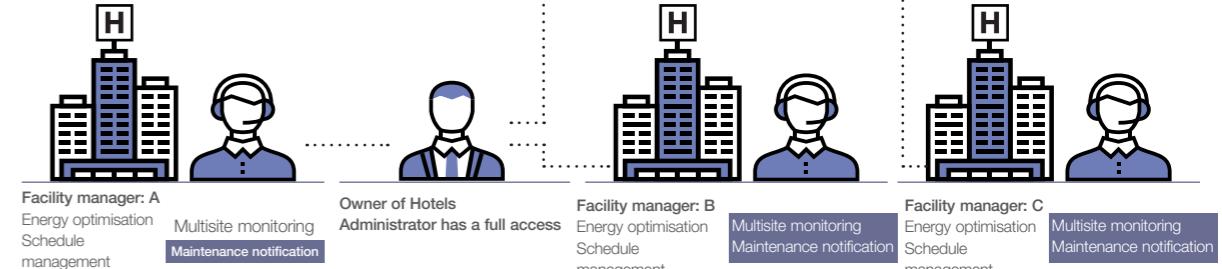

### Schedule setting

• Yearly / weekly / holiday timer setting as you want

### User customisation\*2

Site administrator can create users as desired and assign customised profiles.

### Powerful statistics for energy savings

• Power consumption, capacity, efficiency level can be compared with different parameters (Yearly / monthly / weekly / daily bases)

### Maintenance notification

• Error notification by email and with floor layout  
• Maintenance notification of PAC / VRF outdoor units  
• Remote service checker function

## Main functions per user type

## Remote service checker function

### Zero down time

- Quick analysis & response
- Time & Cost saving for service maintenance task

### Recording service checker parameters from wherever you are!

- Data duration: Maximum 120 minutes
- Data frequency: 10 – 90 seconds
- Mode selection: With test run or Without test run
- Count down schedule setting available

## Panasonic AC Smart Cloud parts lists

CZ-CFUSCC1

AC Smart Cloud communication adaptor. Up to 128 groups, 128 units control

Note: Please contact an authorized Panasonic dealer.

# Controllers

A wide variety of control options to meet the requirements of different applications.

## Next Generation Control Solutions

WLAN Control

Smart Cloud Control

BMS Plug &amp; Play

Note: Additional accessories or devices are required. Please consult Panasonic for details.

\*New Zone controller (CZ-RTC6Z) can be connected with 3.6 kW to 22.4 kW Ducted (PE3 and PF3) Indoors and VRF Ducted (M1, E1, E2, E1R, F2, F3 and Z1) Indoors.

\*Connectable to selected Panasonic ducted models only, please consult Panasonic for more details.

## Timer remote controller (CZ-RTC4)

Dimensions  
H 120 x W 120 x D 20 mm

### Basic remote controller ON/OFF

- Operation mode changeover (Cooling, Heating, Dry, Auto, Fan).
- Temperature setting (Cooling / Dry: 18-30 °C Heating: 16-30 °C).
- Fan speed setting H / M / L and Auto.
- Air flow direction adjustment.
- ECONAVI on / off<sup>\*2</sup>

### Time Function 24 hours real time clock

- Day of the week indicator.

### Weekly Programme Function

- A maximum of 6 settings/day and 42 settings/week can be programmed.

### Outing Function

- This function can prevent the room temperature from dropping or rising when the occupants are out for a long time.

### Sleeping Function

- This function controls the room temperature for comfortable sleeping.

### Maximum 8 indoor units can be controlled from one remote controller

### Remote control by main remote controller and sub controller is possible

Maximum 2 remote controllers (main remote controller and sub controller) can be installed for one indoor unit.

<sup>\*2</sup> Depending on the model, some menus cannot be used.

## Wireless remote controller

For 4-WAY  
Cassette type  
CZ-RWS3  
+CZ-RWRU3

For all Ducted types  
CZ-RWS3  
+CZ-RWRC3

For Under Ceiling type  
CZ-RWS3  
+CZ-RWRT3

Remote control by main remote controller and sub controller is possible

- Maximum 2 remote controllers (main remote controller and sub controller) can be installed for one indoor unit.

When CZ-RWS3+CZ-RWC3 is used, wireless control becomes possible for all indoor units

- When a separate receiver is set up in a different room, control from that room also becomes possible.
- Automatic operation by means of the emergency operation button is possible even when the remote controller has been lost or the batteries have been exhausted.

In addition, there are other functions such as temperature setting, operation switching, wind direction/fan speed setting, etc

### Ventilation independent operation is possible

When commercial ventilation fans or heat-exchange ventilation fans have been installed, they can be operated with this remote control (interlocked operation with the indoor unit or independent ventilation ON/OFF).

## Wired remote controller (CZ-RD52CP)

# T10 Terminal for External Control (Digital Connection)

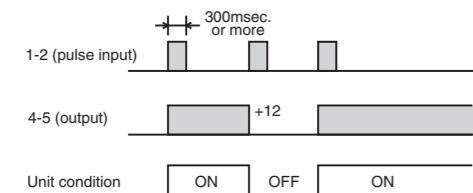

Connecting an indoor unit to an external device is easy.

The T10 Terminal featured in the electronic circuit board of all indoor units enables digital connection to external devices.

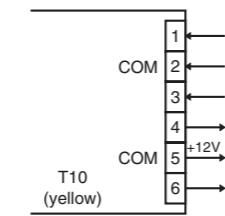

## 1. T10 Terminal Specification (T10:CN061 at indoor unit PCB)

- Control items: 1. Start/stop input  
2. Remote controller prohibit input  
3. Start signal output  
4. Alarm signal output

NOTE: The wire length from indoor unit to the Relay must be within 2.0m.  
Pulse signal changeable to static with JP cutting. (Refer to JP001)

### Example of wiring

### Condition

- 1-2 (Pulse input): Unit ON/OFF condition switching with a pulse signal. (1 pulse signal: shortage status more than 300msec.or more)
- 2-3 (Static input): Open/ Operation with Remote is permitted.(Normal condition) Close/ Remote controller is prohibited.
- 4-5 (Static output): 12V output during the unit ON. / No output at OFF.
- 4-6 (Static output): 12V output when some errors occur / No output at normal.

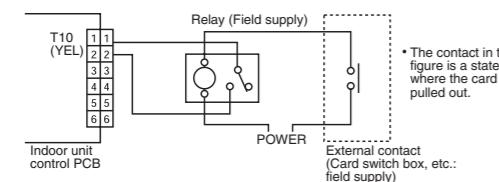

## 2. Usage Example

### Forced OFF control

#### Condition

1-2 (Static input): Close/ Operation with Remote is permitted. (Normal condition) Open/ Unit is forcibly OFF and Remote controller operation is prohibited.

#### Example of wiring

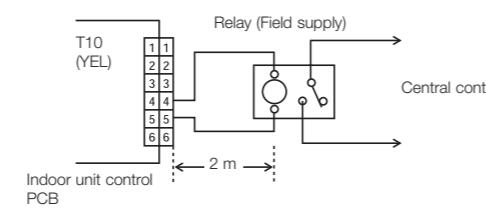

Note: The wire length from indoor unit to the Relay must be within 2.0m

### Operation ON/OFF signal output

#### Condition

4-5 (Static output): 12V output during the unit ON / No output at OFF

#### Example of wiring

Note: The wire length from indoor unit to the Relay must be within 2.0m

Pulse signal changeable to static with JP cutting. (Refer to JP001)

# ECONAVI

## Reducing inefficient air conditioning

Providing outstanding energy-saving performance, Panasonic's large capacity air conditioners can be connected to ECONAVI to detect when energy is being wasted.

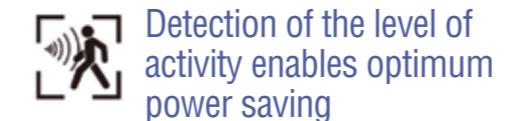

ECONAVI senses the presence or absence of people and the level of activity in each area of a room. When unnecessary heating or cooling is detected, indoor units are individually controlled to match room conditions for energy-saving operation.

ECONAVI Sensor  
CZ-CENSC1

• please check specific models for compatibility

## How 2 sensors work for human detection

**Detection of the level of activity enables optimum power saving**

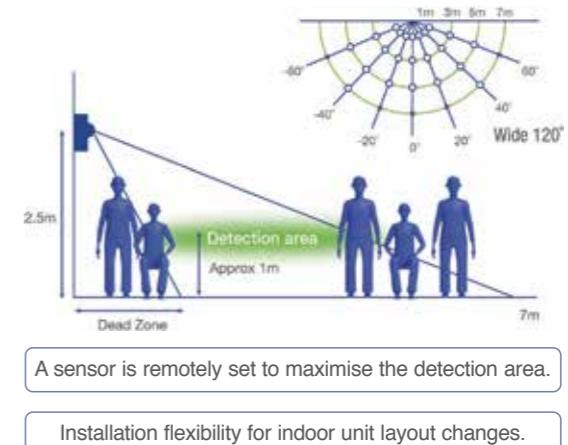

**Sensors are remotely located to maximise the energy-saving effect**

Presence or absence of people and the level of activity in the room are detected in real time. Set temperature is automatically adjusted to optimise the power consumption.

### Case study at coffee shop

### Wide detection area

Installation flexibility for indoor unit layout changes.
